

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; User Needs Survey by the Space Weather Advisory Group**

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on December 11, 2025, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic & Atmospheric Administration (NOAA), Commerce.

Title: User Needs Survey by the Space Weather Advisory Group.

OMB Control Number: 0648–0814.

Form Number(s): None.

Type of Request: Regular submission (Extension of a current information collection).

Number of Respondents: 491.

Average Hours per Response:

- *Aviation:* 1 hour
- *Emergency Management:* 8 hours
- *Global Navigation Satellite System:* 15 minutes (Survey) and 1 hour (Interview)
- *Human Space Flight:* 1 hour
- *Power Grid:* 1 hour
- *Research Sector:* 1 hour
- *Space Situational Awareness:* 1 hour

Total Annual Burden Hours: 432.

Needs and Uses: The data collection is sponsored by Department of Commerce (DOC)/National Oceanic and Atmospheric Administration (NOAA)/National Weather Service (NWS)/Space Weather Advisory Group (SWAG). The SWAG is required under 51 U.S. Code § 60601(d)(3) to undertake a comprehensive survey of space weather product users to identify the “research, observations, forecasting, prediction, and modeling advances required to improve space weather products.” Specifically, the SWAG will (i) assess the adequacy of current Federal Government goals for lead time,

accuracy, coverage, timeliness, data rate, and data quality for space weather observations and forecasting; (ii) identify options and methods to, in consultation with the academic community and the commercial space weather sector, improve upon the advancement of the goals described in clause (i); (iii) identify opportunities for collection of new data to address the needs of the space weather user community; (iv) identify methods to increase coordination of space weather research to operations and operations to research; (v) identify opportunities for new technologies, research, and instrumentation to aid in research, understanding, monitoring, modeling, prediction, forecasting, and warning of space weather; and (vi) identify methods and technologies to improve preparedness for potential space weather phenomena.

This collection identified seven sectors (Aviation, Emergency Management, Global Navigation Satellite System, Human Space Flight, Power Grid, Research, and Space Situational Awareness/Space Traffic Management) that will be consulted as part of this effort. Information will be collected from each of the sectors as needed. Respondents in each sector include the general public, defined as (adults ages 18+). Members of the SWAG will oversee recruitment of the respondents. Respondents will be asked questions about their current use of space weather observations, information, and forecasts, technological systems, components or elements affected by space weather, current and future risk and resilience activities, future space weather requirements, and unused or new types of measurements or observations that would enhance space weather risk mitigation. This data collection serves many purposes, including gaining a better understanding of the needs of users of space weather products. The SWAG will use the data to identify the space weather research, observations, forecasting, prediction, and modeling advances required to improve space weather products. Specifically, the information will be used to advise the National Science and Technology Council's Space Weather Operations, Research, and Mitigation (SWORM) Subcommittee on improving the ability of the United States to prepare for, mitigate, respond to, and recover from space weather storms.

Affected Public: Individuals or households; Business or other for-profit organizations; Not-for-profit institutions; State, Local, or Tribal government; Federal government.

Frequency: On occasion.

Respondent's Obligation: Voluntary.
Legal Authority: 51 U.S. Code 60601 Space weather.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0814.

Sheleen Dumas,

Departmental PRA Compliance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Atlantic Highly Migratory Species (HMS) Recreational Landings and Bluefin Tuna Catch Reports**

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on July 11, 2025, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic & Atmospheric Administration (NOAA), Commerce.

Title: Atlantic Highly Migratory Species (HMS) Recreational Landings and Bluefin Tuna Catch Reports.

OMB Control Number: 0648–0328.

Form Number(s): None.

Type of Request: Regular submission (extension of a current information collection).

Number of Respondents: 14,161.

Average Hours per Response: 5–10 minutes per landings report.

Total Annual Burden Hours: 1,557.

Needs and Uses: Catch reporting from recreational and commercial handgear fisheries provides important data used to monitor catches of Atlantic highly migratory species (HMS) and supplements other existing data collection programs. Data collected through this program are used for both domestic and international fisheries management and stock assessment purposes.

Atlantic bluefin tuna (BFT) catch reporting provides real-time catch information used to monitor the BFT fishery. Under the Atlantic Tunas Convention Act of 1975 (ATCA, 16 U.S.C. 971), the United States (U.S.) is required to adopt regulations, as necessary and appropriate, to implement recommendations of the International Commission for the Conservation of Atlantic Tunas (ICCAT), including recommendations on a specified BFT quota. BFT catch reporting helps the U.S. monitor this quota and supports scientific research consistent with ATCA and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act, 16 U.S.C. 1801 *et seq.*). Recreational anglers and commercial handgear fishermen are required to report specific information regarding their catch of BFT.

Atlantic billfish and swordfish are managed internationally by ICCAT and nationally under ATCA and the Magnuson-Stevens Act. This collection provides information needed to monitor the recreational catch of Atlantic blue marlin, white marlin, and roundscale spearfish, which is applied to the recreational limit established by ICCAT, and the recreational catch of North Atlantic swordfish, which is applied to the U.S. quota established by ICCAT. This collection also provides information on recreational landings of West Atlantic sailfish, which is unavailable from other established monitoring programs.

Affected Public: Businesses or other for-profit organizations; individuals or households; and State, Local, or Tribal government.

Frequency: Irregular as the reporting requirement is triggered by landing a bluefin tuna, billfish, or swordfish. Most permit holders will only need to report once or twice a year.

Respondent's Obligation: HMS Angling, Charter/Headboat, and Atlantic Tunas General category permit holders are required to report landings of billfish and swordfish and bluefin tuna catch (*i.e.*, landings and dead discards) within 24 hours.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), and the Atlantic Tunas Convention Act of 1975 (16 U.S.C. 971 *et seq.*).

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0328.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; NOAA Space-Based Data Collection System (DCS) Agreement

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on December 22, 2025, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration (NOAA), Commerce.

Title: NOAA Space-Based Data Collection System (DCS) Agreement.

OMB Control Number: 0648–0157.

Form Number(s): None.

Type of Request: Regular submission [revision and extension of a current information collection].

Number of Respondents: 225.

Average Hours per Response: .5 hours.

Total Annual Burden Hours: 113.

Needs and Uses: This request is for a revision and extension of an existing information collection. The Polar-Orbiting Operational Environmental Satellite (POES) data collection system (DCS), also known as the Argos system, is being removed from this collection as it is no longer administered by the National Oceanic and Atmospheric Administration (NOAA).

NOAA operates a space-based data collection system (DCS) per 15 CFR part 911: the Geostationary Operational Environmental Satellite (GOES) DCS. The GOES DCS is operated to support environmental applications, *e.g.*, meteorology, oceanography, hydrology, ecology, and remote sensing of Earth resources. Presently, the majority of users of this system are government agencies and researchers and much of the data collected by the GOES DCS are provided to the World Meteorological Organization via the Global Telecommunication System for inclusion in the World Weather Watch Program.

Current loading does not use the entire capacity of that system, so NOAA is able to make its excess capacity available to other users who meet certain criteria. Applications are made in response to the requirements in 15 CFR 911 (under the authority of 15 U.S.C. 313, Duties of the Secretary of Commerce and others), using system use agreement (SUA) form. The application information received is used to determine if the applicant meets the criteria for use of the system. The SUA contains the following information: (1) the period of time the agreement is valid and procedures for its termination, (2) the authorized use(s) of the DCS, and its priorities for use, (3) the extent of the availability of commercial services which met the user's requirements and the reasons for choosing the government system, (4) any applicable government interest in the data, (5) required equipment standards, (6) standards of operation, (7) conformance with applicable International Telecommunication Union (ITU) and Federal Communications Commission
