## Instructions for populating the Specialty/Facility Types without using the drop-down menu

### Important Notes

- The lists below show the individual and facility provider specialty types that can be entered in the NA template.
- Column C shows the Individual Provider Specialty Types. Column D shows the Facility Providers Specialty Types. Both Individual Providers Specialty Types and Facility Providers Specialty Types should be entered on the Network Adequacy Provider tab.
- If you would like to enter more than 1 specialty type for a record, please comma separate each type. For example, if you would like to assign 001 General Practice and 002 Family Medicine specialty types to a provider, please enter the types as "001 General Practice, 002 Family Medicine". Entering multiple specialty types using any other convention will result in a validation error.
- The same comma separation technique can be used to assign multiple Network IDs to the same provider. For example, an issuer in Virginia with 3 Network IDs could assign network 1 and network 3 to the same provider by entering "VAN001, VAN003".

**All providers and facilities must be appropriately licensed, accredited, or certified to provide services in their state, as applicable, and must have in-person services available.**

**Taxonomy Codes**

**Important Notes**

- The "Taxonomy Codes" tab serves the following purposes: (1) serves as a reference file that identifies the provider taxonomy codes that issuers can include in their network adequacy data submissions; (2) filters the taxonomy codes into each individual provider and facility specialty type, so that issuers know which providers to include in which individual provider and facility specialty categories; and (3) crosswalks provider types into their respective categories for time and distance standards.
- For brevity purposes, when discussing provider types for network adequacy, we will use the term "behavioral health" to encompass mental health and substance use disorders.
- Under the circumstances described below, advanced practice registered nurses (APRNs) and physician assistants (PAs) could be included as primary care providers.
- Under the circumstances below, APRNs who specialize in behavioral health services could be included in the outpatient clinical behavioral health provider category.
- The purpose of including APRNs and PAs is to inform CMS of the rare instances in which an issuer contracts with non-MD/DO primary care and behavioral health services providers in underserved counties to serve as the major source of these types of care for enrollees. In these instances, organizations may include submissions under the non-MD/DO primary care and outpatient clinical behavioral health specialty codes if the contracted APRN or PA satisfies the following conditions:
  - currently licensed in the state;
  - meets the state's requirements governing the qualifications of that provider type;
  - fully credentialed by the organization as a provider of primary care or behavioral health services;
  - functions in accordance with state law as the primary source for the enrollee's primary care or behavioral health services (i.e., not to supplement a physician's care); and
  - practices in or renders services to enrollees residing in a Health Professional Shortage Area.
- For Acute Inpatient Hospitals (facility specialty type code 040), issuers must report these hospitals within their network adequacy submissions as "Acute Inpatient Hospitals" (rather than a taxonomy code), which are defined as hospitals that provide all-day, year-round emergency services. Due to known data integrity issues (e.g., a high number of hospital outpatient facilities being incorrectly reported as acute inpatient hospitals, etc.), issuers may not use the National Uniform Claim Committee (NUCC) hospital taxonomy code to report such hospitals for network adequacy submissions.
- For Cardiac Surgery Programs (facility specialty type code 041), Cardiac Catheterization Services (facility specialty type code 042), and Critical Care Services - Intensive Care Units (ICU) (facility specialty type code 043), issuers must report within their network adequacy submissions the respective provider types that filter into these facility specialty types. Since these are services rather than facility types, there are no specific taxonomy codes that align completely with these specialty codes.

## County Names used in the Network Adequacy Template

The list below shows the county names that are used and accepted in the Network Adequacy template. If you aren't using the drop-down menus, please ensure that your county names match the names below. A different version of a county name will result in a validation error. The county names below are the same as those in the Service Area template. Only include the county name in the county field, do not include the FIPS code.

Below are the validation errors that were identified in the submitted data. Please correct these errors. You must have a valid template before you can export data to XML files. Select the Cell address that is underlined and highlighted in blue to navigate to the specified error.

**Important Note:** If one or more rows are deleted in a provider tab or data is reorganized, cell hyperlinks in that tab may no longer be accurate. Please re-run the data validation on the 'User Control' tab to refresh the hyperlinks if this occurs.
