Abstract: A management framework that allows the public to experience the unique winter resources and recreational opportunities at Yellowstone National Park is governed by NPS regulations codified in 36 CFR 7.13, “Yellowstone National Park.” Access to most of the park in the winter is limited by distance and the harsh winter environment which presents challenges to safety and park operations.

In response, the NPS provides opportunities for park visitors to experience Yellowstone in the winter via over-snow vehicles (snowmobiles and snow coaches, collectively OSVs). 36 CFR 7.13 includes provisions that allow greater flexibility for commercial tour operators, provide mechanisms to make the park cleaner and quieter during the winter seasons, reward OSV innovations and technologies, and allow increases in visitation. All OSVs operating in the park are required to meet air and sound emission standards and be accompanied by a guide.

The NPS will use Form 10–650, “OSV Monthly Use Report” to ensure that OSVs meet NPS emission standards to operate in the park. Commercial OSV operators must complete the Form 10–650, “OSV Monthly Use Report” to:

- Transportation Events (§ 7.13(l)(11)(i)–(iii))
- Emission and Sound Standards (§ 7.13(l)(4)(vii) and (5)) and
- Enhanced Emission Standards. (§ 7.13(l)(11)(iv)).

Form 10–650, “OSV Monthly Use Report,” form collects information to: (1) ensure that OSVs meet NPS emission standards to operate in the park; (2) evaluate commercial tour operators’ compliance with allocated transportation events and daily and seasonal OSV group size limits; (3) ensure that established daily transportation event limits for the park are not exceeded; (4) confirm that commercial tour operators do not run out of authorizations before the end of the season and create a gap when prospective visitors cannot be accommodated; and (5) guarantee compliance with applicable laws and regulations.
