Hello, I am writing to express my sincere concern regarding the proposed increases to the wage levels. The rule is intended to protect American workers but will do the opposite in practice because increasing what foreign workers must make does not immediately mean that companies will raise the wages for similarly situated US workers. This will cause severe discrepancies in the workplace that cannot be quickly addressed or reversed. Further, the DOL and USCIS already have many regulatory measures in place to ensure foreign workers are properly authorized and meet all mandatory statutory requirements. The wage levels are already quite arbitrary and this change will only force more employers to turn to private surveys. Please do not proceed with the rule as proposed as it will be catastrophic for US workers and their employers.
