there should be zero inmdenity payments to farmers for avian flu. a healthy farm animal can withstand the flu. the farm animals raised in the usa are given the absolutely lower standard of care that keep them miserable all of their lives. the mother pigs cant turn around or move for their entire short lives. the hicksnd are packed into ammonia filled homes. no vet care never for any farm animal. never vet care although they lie sick omg the farm fflow being pecked to death and eaten by other animals. no vet care. the animals mostly cant over, bringing on sickn ess of all kinds. fed chemicals to make them grow so their bodies are not even normal but chemically changed by ractopamine, etc. to make them grow faster, nor normally. the farm industry in the jusa has the most abusive lowest standard of care anywhere ein the world. nobody treats farm animals as bad as USA except maybe china. we need to have healthy farm animals if we have them at all. otherwise just shut down and no meat for Americans anymore. just vegetables. we cannot go on like this much longer. the abuse to gods creatures is intense by these profiteering lousy farmers in USA.
