Rule:

“DoD unique identifier means an alpha-numeric string of ten characters assigned within the Supplier Performance Risk System to each contractor assessment with the first two characters indicating the confidence level of the assessment. “

Comment:

My one comment here is to just make sure everyone is aware that a new UID is generated for each SPRS score entered for that system. So, the original UID that you had when you won the contract will be replaced when there is a new score entered at 3 years or if a significant change necessitates a re-assessment. The reporting section requires: “(3) Report to the Contracting Officer any changes to the list of DoD UIDs applicable to each of the contractor information systems that process, store, or transmit FCI or CUI and that are used in performance of the contract.”

I believe this provision covers the need to let the Contractor Officer know when there is a new UID as a result of a new score, or if there is a completely new system being introduced. As such, I do not request any changes to the rule, I just wanted to make sure everyone was aware of the feature of new UIDs for new scores in SPRS in case there was a desire for there to be a permanent UID for a system.
