Goals/Purpose	The goal is to renew the OMB package.
Objective:	The objective is to renew the OMB package.
Does your project measure health disparities among populations/groups experiencing social, economic, geographic, and/or environmental disadvantages?:	Not Selected
Does your project investigate underlying contributors to health inequities among populations /groups experiencing social, economic, geographic, and/or environmental disadvantages?:	Not Selected
Does your project propose, implement, or evaluate an action to move towards eliminating health inequities?:	Not Selected
Activities or Tasks:	All Work Onsite at CDC Facilities
Target Populations to be Included/Represented:	Other - The objective is to renew the OMB package.
Tags/Keywords:	Poison Control Centers
CDC's Role:	Activity originated and designed by CDC staff, or conducted at the specific request of CDC, or CDC staff will approve study design and data collection as a condition of any funding provided ; CDC employees will participate as co-authors in presentation(s) or publication(s)
Method Categories:	Individual Interview (Quantitative)
Methods:	CDC works with America's Poison Centers who, in turn, work with the 55 individual poison centers who collect the data. Data collection methods are determined by the individual poison centers with America's Poison Centers. Typically, this entails contacting exposed persons who called the poison center with a follow-up survey. Overarching parameters for specific study will be provided by CDC in coordination with America's Poison Centers.
Collection of Info, Data or Biospecimen:	Individual poison centers will collect the data and send via their typical routes to America's Poison Centers. America's Poison Centers combines the data into one secure file and sends to CDC
Expected Use of Findings/Results and their impact:	This activity will generate the renewal of the GenICR to continue the collection of follow-up survey data from those exposed individuals who contact poison centers.
Could Individuals potentially be identified based on Information Collected?	No
