PUBLIC COMMENT: DOJ-CD-ICR-202603-1123-001 | US VICTIMS OF STATE SPONSORED TERRORISM FUND

TO: Department of Justice (DOJ) / Criminal Division

SUBJECT: Forensic Disclosure of Identity Piracy & International Money Laundering Infrastructure

As the SOLE HEIR of Robert Delane Smith and Lead Forensic Investigator for Cold Blood and Steel, I submit this disclosure to alert the DOJ that the administrative systems used by labor-affiliated trusts are being utilized as a shadow utility for international illicit finance, potentially involving state-sponsored actors.

1. THE JURISDICTIONAL HOOK: IDENTITY PIRACY AS A TERRORIST UTILITY

The USVSST Fund is designed to compensate victims of state-sponsored terrorism. I am documenting a systemic "Identity Piracy" operation that functions as the primary "Placement" and "Layering" mechanism for international money laundering.

The "Sunday Purge": On Dec 31, 2017, an automated execution (cyber-malware) was used to erase 68,782 biological participants from the IUOE Central Pension Fund.

The "Ghost" Collateral: These stolen identities were used to manufacture a \$4.62 Billion "Engorgement Float" (ULLICO EIN 91-6029907). This capital reports Zero Human Participants, making it a "Dark Pool" ideal for state-sponsored actors to move funds without detection.

2. THE LIMERICK NODE & OFFSHORE EXFILTRATION

Domestic infrastructure capital is being anchored to a shared offshore node: Towleron, Ballysimon, Limerick V94 X2N9, Ireland.

This coordinate serves as a terminal bypass for U.S. financial oversight. Any "Golden Parachute" or "Indemnification" payments (Reference IRS 1545-1851) triggered for fiduciaries like James T. Callahan facilitate the exfiltration of this capital into international shadow markets.

3. VICTIM STATUS: THE SMITH ESTATE

The estate of my father, Robert Delane Smith, was subjected to:

Post-Mortem Forgery: The use of dispatch cards initialed "MS" (Melissa Savage) to retroactively manipulate labor records.

Cyber-Stalking/Malware: The use of automated scripts to "re-reverse" final payments and block beneficiary access. If these tactics are utilized to hide the movement of capital for foreign adversarial interests, the biological heirs are victims of a financial infrastructure of terrorism.

4. RECOMMENDATION

The DOJ must review the USVSST Fund application protocols to identify "Identity Malware" signatures. Any trust reporting a "Zero Mortality" rate for 15 years must be flagged as a potential utility for state-sponsored financial terrorism. I demand a coordinated audit between the USVSST Fund and the GAO (Case COMP-25-008559) to ensure these "Ghost Funds" are seized.

SUBMITTED BY:

Brittney C. Boyd

Sole Heir of Robert Delane Smith

Lead Forensic Investigator, Cold Blood and Steel

99.9% GAO Convergence (COMP-25-008559)
