

**SUPPORTING STATEMENT FOR
Provider Enrollment Form**

OMB CONTROL NO. 1240-0021

This ICR seeks to revise a currently approved collection, approval to discontinue paper version collection and only collect information electronically, and to extend the expiration date.

We are asking for this ICR to be reviewed and approved as soon as possible due to the July release for system updates concerning these revisions.

A. JUSTIFICATION

1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection. Attach a copy of the appropriate section of each statute and regulation mandating or authorizing the collection of information.

The Office of Workers' Compensation Programs (OWCP) is the agency responsible for administration of the Federal Employees' Compensation Act (FECA), 5 U.S.C. 8101 et seq., the Black Lung Benefits Act (BLBA), 30 U.S.C. 901 et seq., the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA), 42 U.S.C. 7384 et seq., and the Longshore and Harbor Workers' Compensation Act, 33 U.S.C. 901 et seq. These statutes require OWCP to pay for appropriate medical and vocational rehabilitation services provided to beneficiaries. In order for OWCP's billing contractor to pay providers for these services with its bill processing system, providers must enroll with one or more of the OWCP programs that administer the statutes by submitting certain profile information, including identifying information, tax I.D. information, and whether they possess specialty or sub-specialty training. Form OWCP 1168 is used to obtain this information from each provider.

If this information is not obtained before the provider submits his or her first bill for payment, the bill payment process is substantially prolonged and increases the burden on providers. The regulations implementing the above statutes that OWCP administers permit the collection of information necessary to allow its billing contractor to process and pay bills submitted by providers of medical and vocational rehabilitation services. (20 CFR 10.801, 30.701, 725.704, 725.705 and 725.714).

2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.

The information provided is used by all four programs to identify the providers of medical and vocational rehabilitation services, and to direct payments to these providers accurately and in a timely manner. The information obtained also provides data for OWCP's billing contractor to carry out a wide range of automated bill edits, such as the identification of duplicate billings, the application of pertinent fee schedules, utilization review, and fraud and abuse detection. The profile information is also used to furnish detailed reports to providers on the status of previously submitted bills.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also, describe any consideration of using information technology to reduce burden.

In accordance with the Government Paperwork Elimination Act, the current Form OWCP-1168 is electronically interactive. OWCP's billing contractor has allowed the submission of this information to be made online through the billing contractor's web portal at: <https://owcpmed.dol.gov/>. The online information collection and submission process allows more expedited collection of the required information by using best practices in information technology. The paper form will be discontinued and the OWCP will accept only electronic submissions.

4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item A.2 above.

The information collected on this form is not duplicative of any information available elsewhere. The respondent is the only source of the information required to enroll the provider.

5. If the collection of information impacts small businesses or other small entities, describe any methods used to minimize burden.

This information collection was streamlined to obtain the information OWCP's billing contractor needs while imposing the minimum burden on respondents. It does not have a significant economic impact on a substantial number of small entities.

6. Describe the consequence to federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.

The information requested from respondents is the minimum needed to meet the bill processing needs of the four programs and is only collected on an occasional basis (after the first response, the information is only collected if there is a change in the type of information that is needed). Bills for medical and vocational rehabilitation services provided to beneficiaries cannot be

processed for payment by OWCP's billing contractor without the information collected. Failure to collect this data would result in delayed manual payments to respondents.

7. Explain any special circumstances that would cause an information collection to be conducted in a manner:

- **requiring respondents to report information to the agency more often than quarterly;**
- **requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;**
- **requiring respondents to submit more than an original and two copies of any document;**
- **requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records for more than three years;**
- **in connection with a statistical survey, that is not designed to produce valid and reliable results that can be generalized to the universe of study;**
- **requiring the use of statistical data classification that has not been reviewed and approved by OMB;**
- **that includes a pledge of confidentiality that is not supported by authority established in statute or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or**
- **requiring respondents to submit proprietary trade secret, or other confidential information unless the agency can demonstrate that it has instituted procedures to protect the information's confidentiality to the extent permitted by law.**

There are no special circumstances for conducting this information collection.

8. If applicable, provide a copy and identify the date and page number of publication in the *Federal Register* of the agency's notice, required by 5 CFR 1320.8(d), soliciting comments on the information collection prior to submission to OMB. Summarize public comments received in response to that notice and describe actions taken by the agency in response to these comments. Specifically address comments received on cost and hour burden.

Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and recordkeeping,

disclosure, or reporting format (if any), and on the data elements to be recorded, disclosed, or reported.

Consultation with representatives of those from whom information is to be obtained or those who must compile records should occur at least once every 3 years -- even if the collection-of-information activity is the same as in prior periods. There may be circumstances that may preclude consultation in a specific situation. These circumstances should be explained.

A Federal Register Notice inviting public comments on this collection of information was published in the Federal Register on 03/18/2026 at 91 FR 13069. OWCP received six comments; however, only one pertained to the OWCP-1168 form, and the others were outside the scope of the collection. Accordingly, no changes to the information collection were made in response to these comments.

1. Accuracy of the Burden Estimate and the Zero-Cost Fallacy. The agency projects an annual burden of 81,901.55 hours with a respondent cost of \$0.00. This methodology is inaccurate. The \$0.00 calculation ignores the immense timely financial and legal burdens passed onto legitimate legacy claimants' successors or legal heirs who must execute manual procedural overrides when automated portals experience database freezes or server-side rejections. Furthermore, tracking unauthorized modifications within databases that lack rigorous transparent audit logs shifts the structural verification cost entirely onto the public respondents.

OWCP Response:

The hour burden estimates were derived by averaging data compiled from the last two years (January 2024 to December 2025) and using the 2024 hourly wage reported for healthcare support workers in general healthcare support occupations based on Bureau of Labor Statistics current data for May 2024. Respondents incur no start-up, operating, or maintenance costs. All responses are submitted electronically through OWCP's existing billing contractor web portal. Total cost to respondents: \$0.00, as electronic capability already exists.

Additionally, claimants and/or their successors and legal heirs do not become involved in the provider enrollment process. Providers rendering Medical and non-medical services to OWCP claimants are required to enroll with the OWCP to seek reimbursement for services rendered.

OWCP consulted with internal individuals listed in Table 1. The internal representatives include a leader from the agency and personnel with relevant expertise in the medical bill processing system as it pertains to provider enrollment.

To comply with M-22-10, the individuals consulted about the information collection are listed in the table below. We have redacted their names and contact information.

Contact	Organization	Email	Phone
Miriam XXX	OWCP	XXX	XXX
LaTrice XXX	OWCP	XXX	XXX
Amy XXX	OWCP	XXX	XXX

9. Explain any decision to provide any payments or gifts to respondents, other than remuneration of contractors or grantees.

Respondents do not receive any gifts or payments to furnish the requested information.

10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.

The information collected by this form is maintained in OWCP claim files which are fully protected under the Privacy Act. The applicable Privacy Act System of Records are (FECA) DOL/GOVT-1, (Longshore) DOL/OWCP-3 and DOL/OWCP-4, (FECA) DOL/GOVT-1, DOL/OWCP-2 (Black Lung) and DOL/OWCP-11 (Energy).

Reference: <https://www.dol.gov/agencies/sol/privacy>

11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private. This justification should include the reasons why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.

There are no questions of a sensitive nature (as described in paragraph 11 above) on this form.

12. Provide estimates of the hour burden of the collection of information. The statement should:

- **Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. Unless directed to do so, agencies should not conduct special surveys to obtain information on which to base hour burden estimates. Consultation with a sample (fewer than 10) of potential respondents is desirable. If the hour burden on respondents is expected to vary widely because of differences in activity, size, or complexity, show the range of estimated hour burden, and explain the reasons for the variance. Generally, estimates should not include burden hours for customary and usual business practices.**

- **If this request for approval covers more than one form, provide separate hour burden estimates for each form.**
- **Provide estimates of annualized cost to respondents for the hour burdens for collections of information, identifying and using appropriate wage rate categories. The cost of contracting out or paying outside parties for information collection activities should not be included here. Instead, this cost should be included in Item 14.**

Estimated Annualized (average of 2 years) Respondent Cost and Hour Burden

Activity	No. of Respondents	No. of Responses per Respondent	Total Responses	Average Burden (Hours)	Total Burden (Hours)	Hourly Wage Rate	Total Burden Cost
OWCP-1168	18,417	1	18,417	29 minutes	8,901.55	\$23.44	\$208,652.33

The following burden estimates for the three programs are derived by averaging data compiled from the last two years (January 2024 to December 2025), with the assumption that provider enrolling has all the information ready at time of completing the application.

FECA: Approximately 17,505 respondents submit a Form OWCP-1168 each year for new enrollment to the FECA program. It is estimated that each Form OWCP-1168 takes up to 29 minutes for the respondent to prepare, which results in an annual hour burden of 8,461 hours. (17,505 responses x 29 minutes = 507,645/60 minutes = 8,460.75 hours, or 8,461 rounded.)

FECA = 8,461 hours

BLBA: Approximately 12,133 respondents submit a Form OWCP-1168 each year for new enrollment to the BLBA program. It is estimated that each Form OWCP-1168 takes up to 29 minutes for the respondent to prepare, which results in an annual hour burden of 5,864 hours (12,133 responses x 29 minutes = 351,843/60 minutes = 5,864.05 hours or 5,864 rounded).

BLBA = 5,864 hours

EEOICPA: Approximately 12,187 respondents submit a Form OWCP-1168 each year for new enrollment to the EEOICPA program. It is estimated that each Form OWCP-1168 takes up to 29 minutes for the respondent to prepare, which results in an annual hour burden of 5,890 hours (12,187 responses x 29 minutes = 353,423/60 minutes = 5,890.38 hours or 5,890 rounded).

EEOICPA = 5,890 hours

LHWCA: The LHWCA program did not process providers with the OWCP-1168 form. The program is not using the 1168 and OWCP's billing contractor with the information collection updates submitted therein. Moreover, LHWCA and FECA merged into Division of Federal Employees', Longshore and Harbor Workers' Compensation (DFELHWC). This program was not singled out for inclusion in the burden hours because it has a minimal impact to the estimate below.

Since the number of total applications is collective across the three OWCP programs (DCMWC, DEEOIC, DFEC) and includes individual and multiple program enrollments, the number of respondents and burden hours for these programs, Form OWCP-1168 has a total of 18,417 respondents annually and an annual burden of 8,901.55 hours (18,417 x 29 minutes = 534,093 minutes / 60 minutes = 8901.55 hours)

Using the 2024 hourly wage reported for healthcare support workers in general healthcare support occupations based on Bureau of Labor Statistics current data for May 2024 (<https://www.bls.gov/oes/current/oes439199.htm>) of \$23.44 per hour, the respondent annualized cost estimate for this collection is \$208,652.33 (8901.55 x 23.44).

13. Provide an estimate of the total annual cost burden to respondents or recordkeepers resulting from the collection of information. (Do not include the cost of any hour burden shown in Items 12 and 14).

- The cost estimate should be split into two components: (a) a total capital and start up cost component (annualized over its expected useful life); and (b) a total operation and maintenance and purchase of service component. The estimates should take into account costs associated with generating, maintaining, and disclosing or providing the information. Include descriptions of methods used to estimate major cost factors including system and technology acquisition, expected useful life of capital equipment, the discount rate(s), and the time period over which costs will be incurred. Capital and start-up costs include, among other items, preparations for collecting information such as purchasing computers and software; monitoring, sampling, drilling and testing equipment; and record storage facilities.**

- **If cost estimates are expected to vary widely, agencies should present ranges of cost burdens and explain the reasons for the variance. The cost of purchasing or contracting out information collection services should be a part of this cost burden estimate. In developing cost burden estimates, agencies may consult with a sample of respondents (fewer than 10), utilize the 60-day pre-OMB submission public comment process and use existing economic or regulatory impact analysis associated with the rulemaking containing the information collection, as appropriate.**
- **Generally, estimates should not include purchases of equipment or services, or portions thereof, made: (1) prior to October 1, 1995, (2) to achieve regulatory compliance with requirements not associated with the information collection, (3) for reasons other than to provide information or keep records for the government, or (4) as part of customary and usual business or private practices.**

There are no startup, operation, or maintenance costs for this information collection.

The responses will be electronically uploaded using OWCP's billing contractor's web portal and will be 100%. The total cost will be \$0.00, as the electronic capability already exists.

14. Provide estimates of the annualized cost to the Federal Government. Also, provide a description of the method used to estimate cost, which should include quantification of hours, operational expenses (such as equipment, overhead, printing, and support staff), any other expense that would not have been incurred without this collection of information. Agencies also may aggregate cost estimates from Items 12, 13, and 14 into a single table.

The estimated costs to the Federal government of collecting the information on Form OWCP-1168 are set out below:

Mailing/Developmental costs: There are no mailing/developmental costs associated with this collection of information.

Processing/Reviewing Costs: OWCP pays its billing contractor \$16.39 to process one Form OWCP-1168.¹ Therefore, OWCP's cost to have its contractor process 18,417 of these forms for the three programs is \$301,854.63 (18,417 forms x \$16.39 = \$301,854.63 or \$301,855 rounded).

¹ OWCP entered a new medical bill processing contract in 2020. This current contract encompasses a combination of services that includes mailroom and call center subcontracting costs, and there is not a specific itemized cost associated with processing OWCP-1168. Therefore, the per-form cost calculation was determined by calculating the enrollment portion of the option year price and then dividing this portion by a projected number of enrollments for the full option year.

\$301,855 (processing) = Total Estimated Federal Cost of \$301,855.

15. Explain the reasons for any program changes or adjustments.

The changes to form 1168 include changes to the fields and instructions. The OWCP is mandating electronic enrollment and only allowing paper/fax submissions in certain extenuating circumstances that make electronic submission impossible. The bill processing system currently allows electronic enrollments and is being enhanced to accommodate the revisions.

16. For collections of information whose results will be published, outline plans for tabulations, and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection of information, completion of report, publication dates, and other actions.

Data collected with this form will not be published.

17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.

The OMB Number and expiration date will be displayed.

18. Explain each exception to the certification statement.

There are no exceptions to certification.

B. COLLECTIONS OF INFORMATION EMPLOYING STATISTICAL METHODS.

Statistical methods are not used in these collections of information.
