Comment

I support the revision to and extension of approval for EIA information collection. The burden estimates provided indicates the extensive use of EIA testing, as well as the necessity for continued collection, documentation, and reports related to Equine Infectious Anemia. The extension of approval is fundamental for EIA surveillance and control. Without the approval for extension, there is possible concern for an increase in unreported cases, state- to - state transmission of disease, and decreased quality or accuracy of testing. In regard to the burden reduction, electronic submission systems could directly minimize burden hours.
