Comment

I believe that due to the severity of Equine Infectious Anemia and the lack of an available vaccine, approval of this policy is necessary. Without the proposed renewal of this program, I truly believe that documentation of new cases of EIA would be greatly misconstrued. The renewal of this APHIS' policy would reduce burden and ease the minds of all involved by incorporating automatic monitoring methods meant to decrease work load of individuals. Overall, approval of renewal for another 3 years would work to maintain accuracy and reliability of records, and therefore, stop the spread of this detrimental disease.
