<h2 class="western">General Comment</h2>
<p>I feel like some parts of the proposal could be explained more in
detail. I think the Centers for Medicare & Medicaid Services
(CMS) could be more clear about how these rules could be enforced. It
does not fully explain how CMS would have all patients receive care
without creating barriers for people who count on RNHCIs. It would be
helpful if CMS could clarify how these rules would work and how they

```

would make sure patients are protected without taking away access to care that people rely on.</p>
