Please don't allow hunting on these lands anymore. Hunting causes animals to suffer and it has caused the death of too many animals. Hunting causes animal suffering because a creature suffers when he or she is killed and it's made worse when the heart is missed in the first shot. The gunshots also disrupt other animals' peace and habitats. A wildlife refuge should be a place of safety and peace for the animals that live there, not a place where animals get killed because people want to kill them. People don't have to kill any of these animals, not even for food. There are a lot of food options available for people that do not involve animals. And there are a lot of nature activities that do not involve harming or killing animals. Please protect the animals and put the well-being of the animals first. All animals are precious. And people don't need to kill some animals to balance certain animal populations. When people kill some animals like deer that are considered prey, then the people zero in on animals that are considered predators or even competitors to these animals and start killing these animals, because the people will claim as they have done before that these predatory animals are killing too many of the prey animals. So much for over population! Animals deserve better and they need strong protections against these killings. Please protect the animals.
