ACS-400C

February 2026

American Community Survey

Internet Data Collection Instrument Screen Capture Guide

2027

How to Use This Guide

This document contains copies of screens respondents will see in the ACS Internet Questionnaire[1]. You can use this guide as a reference when talking to respondents.

On the next page, you will see a table of contents that contains links rather than page numbers. Because you will be using this guide on your computer, this format will allow you to use **Ctrl + Click** on a page name and navigate directly to that page. Most of the screen capture names are the same as the page names in the instrument.

Note: Some screens may change text and appearance depending on the situation or makeup of the household.

Mobile Devices: In the 2016 data collection year a mobile optimized view was introduced for the Internet Data Collection instrument. If respondents are viewing the online instrument via a mobile device the screen layout will appear different based upon screen size. FAQs, English/Spanish Language toggle, and Save and Logout text are removed and replaced with a Menu button on the right-hand side of the header. Questions with a large amount of text will not be displayed on one screen and users will have to scroll to view the entire questions text.

Since the PRCS instrument is still in development, screens that have text that differs from the Stateside version will be marked with ** next to the screen title within this document to indicate the differences between the American Community Survey and the Puerto Rico Community Survey. Corresponding comments will be included at the bottom of the page.

In addition, all banners in the Puerto Rico Community Survey instrument will display “Puerto Rico Community Survey” bold, in a style consistent with the American Community Survey.

[1] This screen capture guide does not contain any Title 13 data or other personally identifiable information (PII). All data are fictitious and any resemblance to actual data is coincidental.

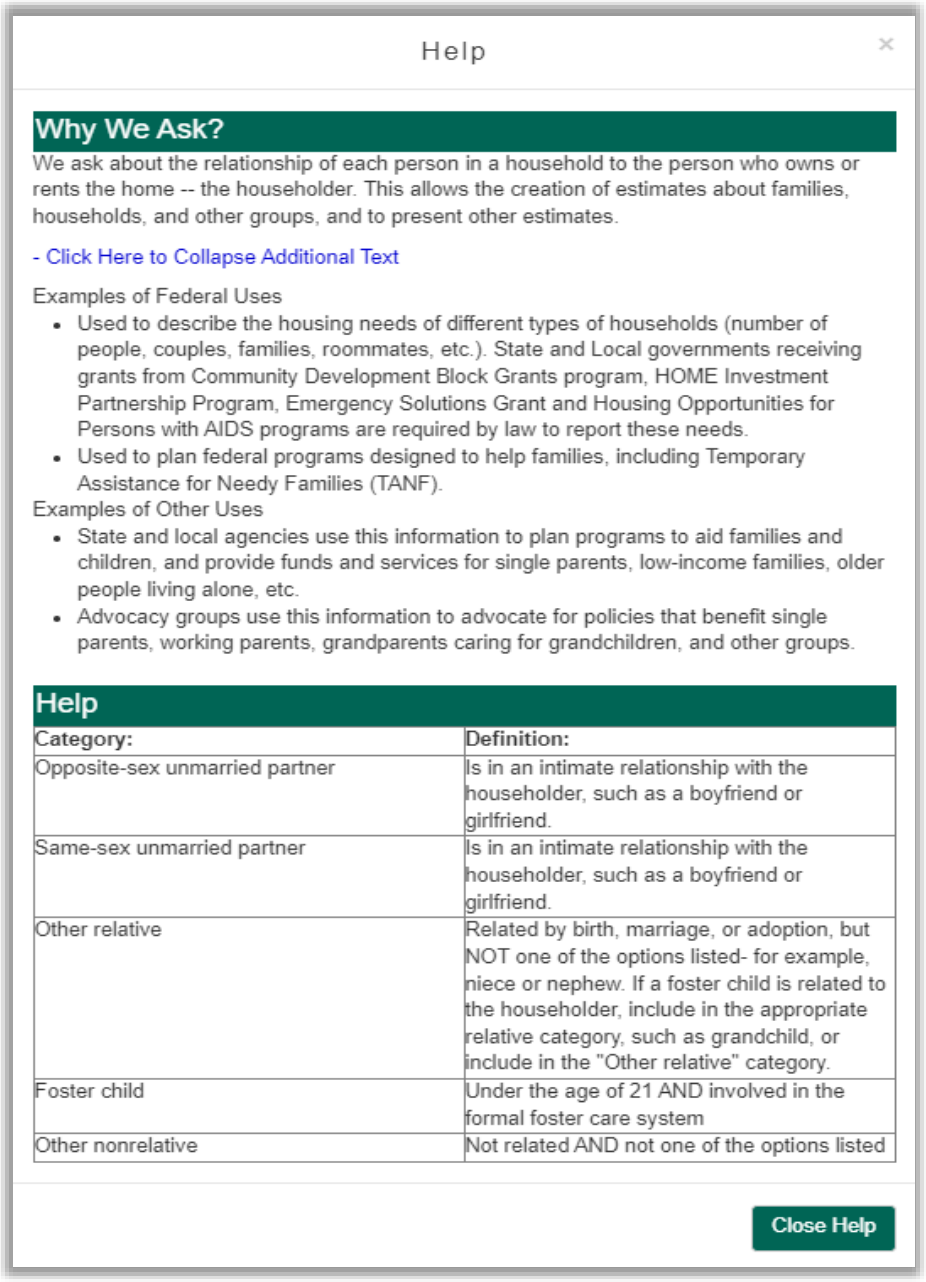
relationship help



Help

Why We Ask?

We ask about the relationship of each person in a household to the person who owns or rents the home -- the householder. This allows the creation of estimates about families, households, and other groups, and to present other estimates.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used to describe the housing needs of different types of households (number of people, couples, families, roommates, etc.). State and Local governments receiving grants from Community Development Block Grants program, HOME Investment Partnership Program, Emergency Solutions Grant and Housing Opportunities for Persons with AIDS programs are required by law to report these needs.
- Used to plan federal programs designed to help families, including Temporary Assistance for Needy Families (TANF).

Examples of Other Uses

- State and local agencies use this information to plan programs to aid families and children, and provide funds and services for single parents, low-income families, older people living alone, etc.
- Advocacy groups use this information to advocate for policies that benefit single parents, working parents, grandparents caring for grandchildren, and other groups.

Help

Category:	Definition:
Opposite-sex unmarried partner	Is in an intimate relationship with the householder, such as a boyfriend or girlfriend.
Same-sex unmarried partner	Is in an intimate relationship with the householder, such as a boyfriend or girlfriend.
Other relative	Related by birth, marriage, or adoption, but NOT one of the options listed- for example, niece or nephew. If a foster child is related to the householder, include in the appropriate relative category, such as grandchild, or include in the "Other relative" category.
Foster child	Under the age of 21 AND involved in the formal foster care system
Other nonrelative	Not related AND not one of the options listed

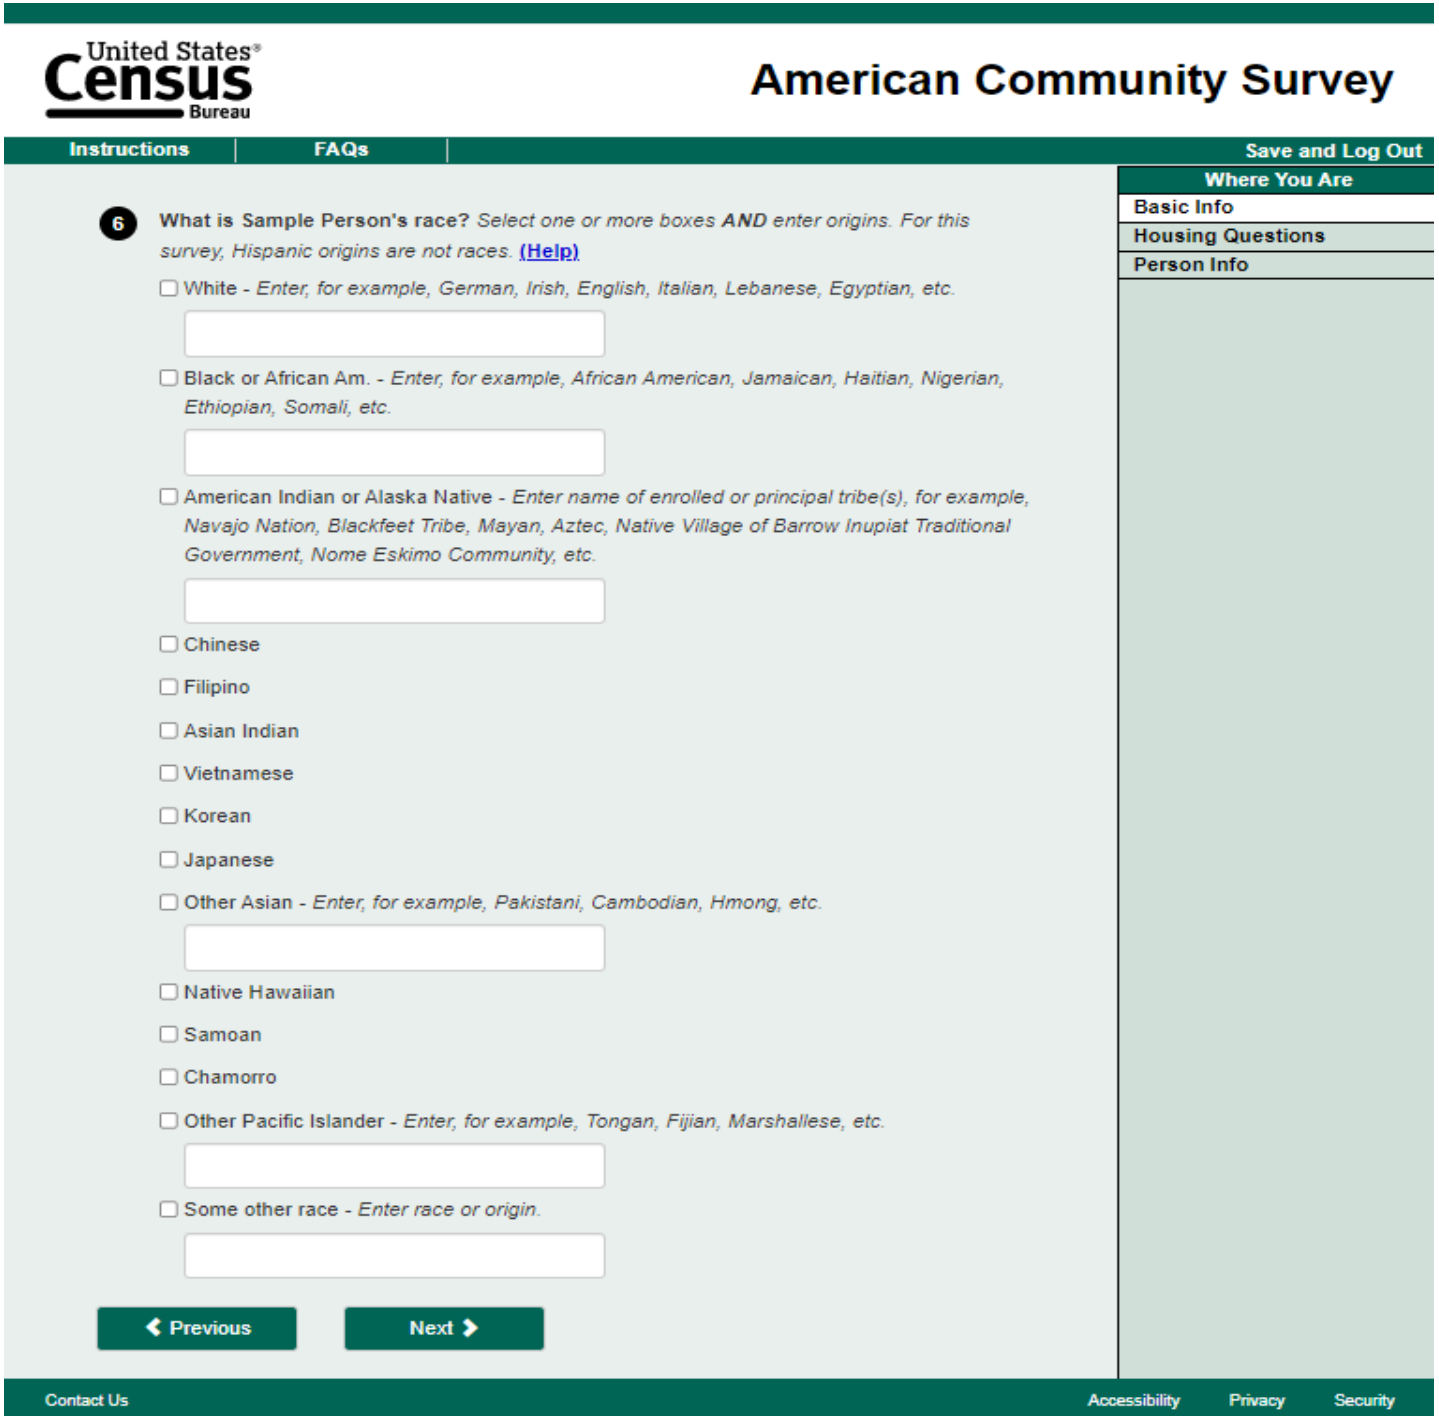
race



Return to Top

race help

Help

Why We Ask?

We ask a question about a person's race to create statistics about race and to present other estimates by race groups.

Local, state, tribal, and federal programs use these data, and they are critical factors in the basic research behind numerous policies, particularly for civil rights. Race data are used in planning and funding government programs that provide funds or services for specific groups.

These data are also used to evaluate government programs and policies to ensure that they fairly and equitably serve the needs of all racial groups and to monitor compliance with antidiscrimination laws, regulations, and policies.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Establish and evaluate the guidelines for federal affirmative action plans under the Federal Equal Opportunity Recruitment Program.
- Monitor compliance with the Voting Rights Act and enforce bilingual election requirements.
- Monitor and enforce equal employment opportunities under the Civil Rights Act of 1964.
- Identify segments of the population who may not be getting needed medical services under the Public Health Service Act.
- Allocate funds to school districts for bilingual services under the Bilingual Education Act.

Examples of Other Uses

- The National Science Foundation uses these data to provide information on people of different racial backgrounds in the science and engineering workforce.
- Several federal agencies use these data to investigate whether housing or transportation improvements have unintended consequences for specific race groups.
- Data on race are used with age and language data to address language and cultural diversity needs in health care plans for the older population.

Help

- Please answer BOTH the question about Hispanic origin AND the question about race. For this survey, Hispanic origins are not races.

- Allocate funds to school districts for bilingual services under the Bilingual Education Act.

Examples of Other Uses

- The National Science Foundation uses these data to provide information on people of different racial backgrounds in the science and engineering workforce.
- Several federal agencies use these data to investigate whether housing or transportation improvements have unintended consequences for specific race groups.
- Data on race are used with age and language data to address language and cultural diversity needs in health care plans for the older population.

Help

- Please answer BOTH the question about Hispanic origin AND the question about race. For this survey, Hispanic origins are not races.
- People who identify their origin as Hispanic, Latino, or Spanish may be of any race.
- The concept of race, as used by the Census Bureau, reflects self-identification by individuals according to the race or races with which they identify. The federal government treats Hispanic origin and race as separate and distinct concepts.
- You may select one or more races.
- If you select the "White" box, enter the name of the specific White origin(s) in the space provided (for example, German, Irish, English, Italian, Lebanese, Egyptian, etc.).
- If you select the "Black or African Am." box, enter the name of the specific Black or African American origin(s) in the space provided (for example, African American, Jamaican, Haitian, Nigerian, Ethiopian, Somali, etc.).
- If you select the "American Indian or Alaska Native" box, enter the name of the person's enrolled or principal tribe(s) in the space provided (for example, Navajo Nation, Blackfeet Tribe, Mayan, Aztec, Native Village of Barrow Inupiat Traditional Government, Nome Eskimo Community, etc.).
- If you select the "Other Asian" box, enter the name of the specific Asian origin(s) in the space provided (for example, Pakistani, Cambodian, Hmong, etc.).
- If you select the "Other Pacific Islander" box, enter the name of the specific Pacific Islander origin(s) in the space provided (for example, Tongan, Fijian, Marshallese, etc.).
- If you select the "Some other race" box, enter the name of the specific group(s) in the space provided.

Help

Why We Ask?

We ask questions about the type of building, units in the structure, and number of rooms and bedrooms to create statistics to help analyze the availability of housing, understand changes in the size and structure of homes, evaluate overcrowding, and plan emergency services.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used to determine demand for senior rental housing.
- Used to calculate emergency allocations of funds for the Low Income Home Energy Assistance Program.

Examples of Other Uses

- State and local agencies use these statistics to determine the housing needs of people in the community.
- Officials use this information to identify home structures in disaster-prone areas during emergency planning and preparation.

Help

If:	Then select:
• Towable RV (e.g., travel trailers, fifth-wheel trailers) • Only porch or shed added to mobile home	A mobile home
• Open space on all sides • House joined only to shed or garage • Mobile home with one or more rooms added or built onto it	A one-family house detached from any other house
• House joined to another house or building by at least one wall from ground to roof • For example, townhouses are a row of houses attached to one another	A one-family house attached to one or more houses
• Self-propelling RVs • Motor homes	Boat, RV, van, etc.

To determine number of apartments in building:

- Count both occupied AND vacant units
- Do NOT count stores or office space

Help

Why We Ask?

We ask about computer ownership, Internet access, and Internet connection types to measure the nationwide development of broadband networks and to inform those working to decrease barriers to broadband access.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used to evaluate national broadband access and adoption rates, with specific focus on underserved areas.
- Before distributing important public health or safety information, agencies can make informed decisions about digital outreach methods.

Examples of Other Uses

- State and local agencies can evaluate broadband access in both urban and rural communities.
- Local governments, non-profit organizations, and businesses can maximize the potential of computers and the internet by better understanding the digital characteristics of their communities.

Help

- **Do NOT** include devices such as:
  - Portable book readers
  - Internet movie players
  - Portable gaming devices
  - Other devices with limited computing capabilities

If:	Then select:
The household has a device provided to them (temporarily or permanently) by an employer or school	Yes, to all the answers that apply: • Desktop or laptop • Smartphone • Tablet or other portable wireless computer • Some other type of computer

Help

Why We Ask?

We ask about the use and cost of common utilities, any applicable condominium fees, taxes, utilities, mortgages and home loans as part of the cost of homeownership. When combined with income, selected monthly owner costs help federal planners measure housing affordability and excessive shelter costs.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used to describe the housing cost burden. State and Local governments receiving certain grants are required by law to use this information.
- Used in many programs that seek to assess poverty, and determine eligibility for housing assistance programs, including the need for housing assistance for elderly, low-income households.

Examples of Other Uses

- States and local agencies use this information to estimate residential costs of energy consumption, improve energy efficiency in their communities, and develop affordable housing.
- Researchers use these statistics to investigate the costs of replacing conventional home heating fuels (including electricity) with renewable energy alternatives.

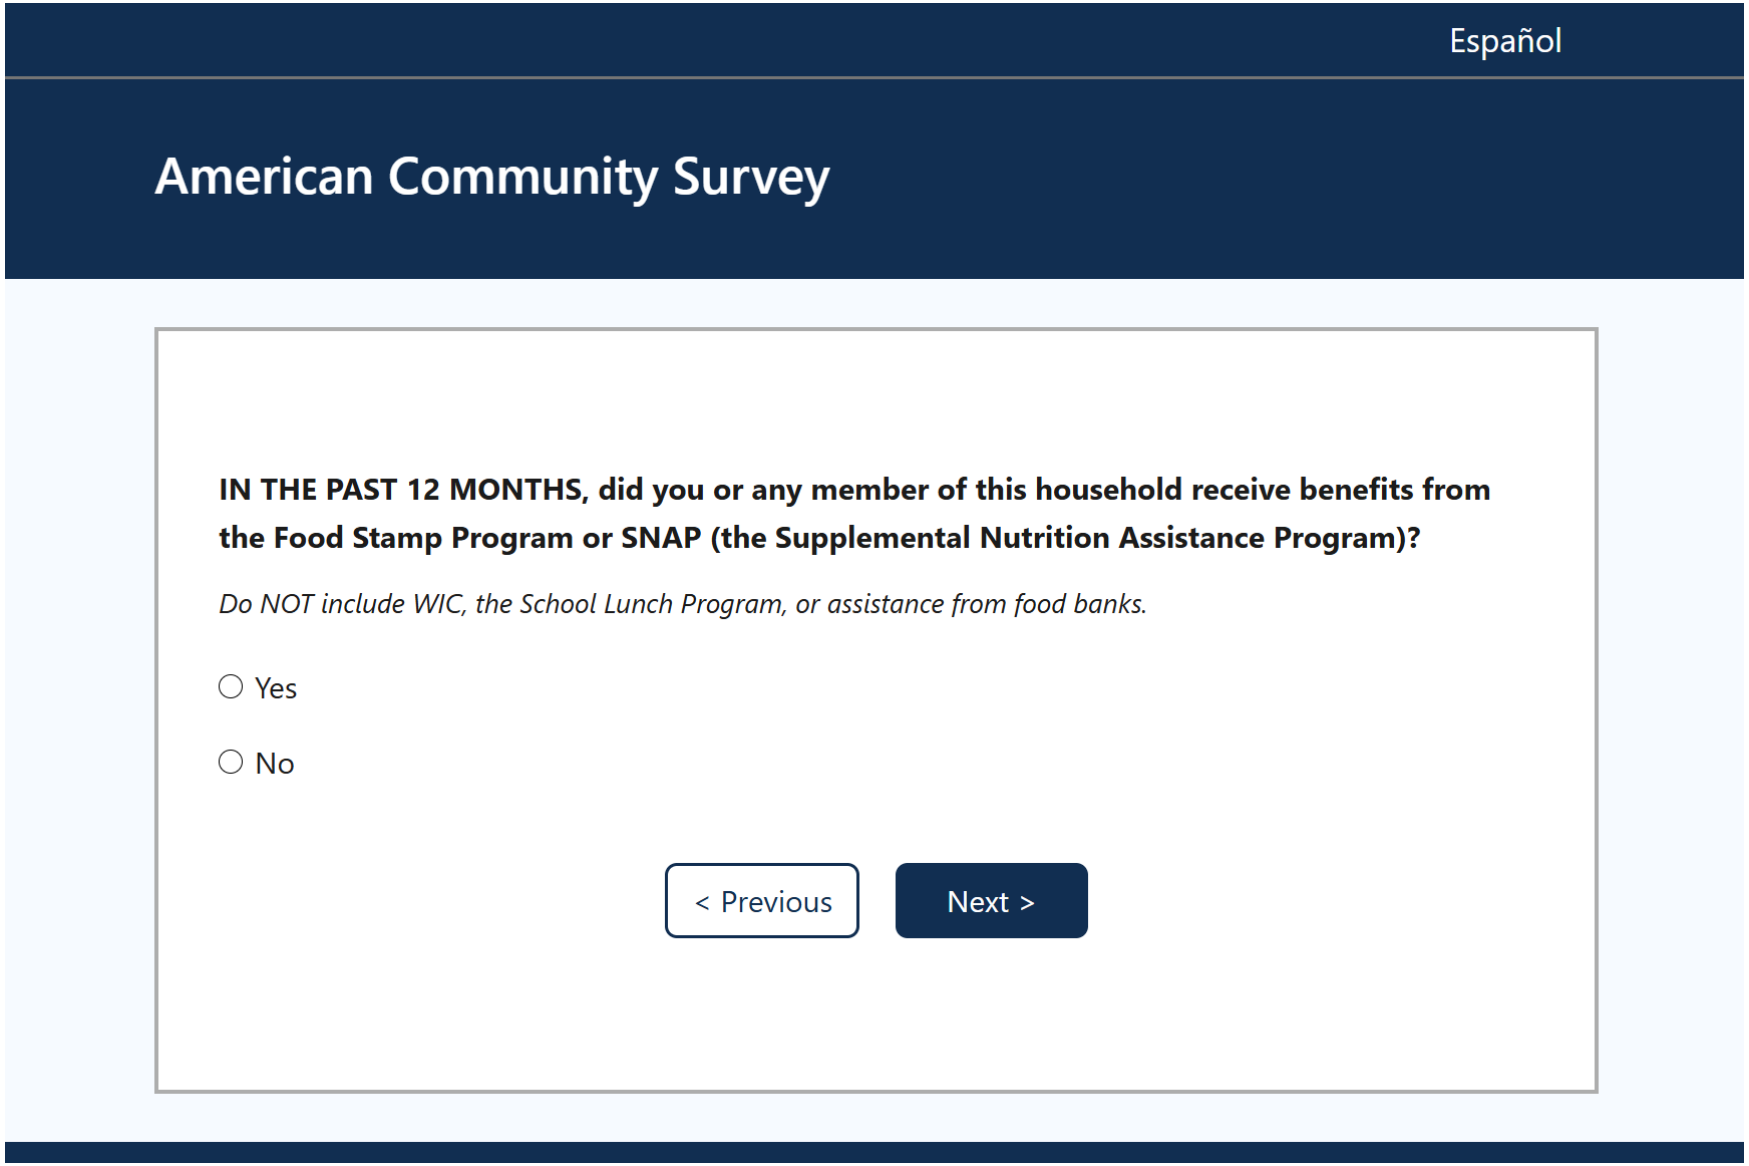
foodstamps**



** For PRCS, "Food Stamp Program or SNAP (the Supplemental Nutrition Assistance Program)" will be replaced with "Nutritional Assistance Program".

Return to Top

foodstamps help

Help

Why We Ask?

We ask about food stamps/Supplemental Nutrition Assistance Program (SNAP) to understand and forecast participation in food assistance programs. In 2008, the food stamp program was renamed SNAP, but the question uses both program names to minimize confusion.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used to streamline administration of the National School Lunch Program and School Breakfast Program by replacing administrative paperwork with ACS estimates of students eligible for free and reduced-price meals.
- Used in the Supplemental Nutrition Assistance Program (SNAP) to calculate the annual Program Access Index (PAI), a measure used to award bonuses to States for strong performance in SNAP administration.

Examples of Other Uses

- State and local agencies use these statistics to assess state food assistance needs and performance, participation rates for eligible families and individuals, and to determine gaps in services and programs.
- Faith-based and other nonprofit organizations use information about food assistance needs to determine where food banks, food kitchens, and other programs could be beneficial, and how their needs can be met with additional resources and services.

Help

- On October 1, 2008, the federal Food Stamp Program was renamed SNAP (Supplemental Nutrition Assistance Program).
- Although most states have SNAP in their program name, some states may also have their own specific name for the program.

Below is a list of state specific names where the program might be known by other than SNAP:

Alabama	Food Assistance Program/SNAP
Arizona	Nutrition Assistance Program/SNAP
California	CalFresh/Food Stamp Program/SNAP
Delaware	Food Supplement Program/SNAP
Florida	Food Assistance Program
Georgia	Food Stamp Program/SNAP
Iowa	Food Assistance
Kansas	Food Assistance Program/SNAP
Maine	Food Supplement Program/SNAP
Maryland	Food Supplement Program/SNAP
Michigan	Food Assistance Program/SNAP
North Carolina	Food & Nutrition Services/SNAP
Vermont	3SquaresVT
Washington	Basic Food Program/SNAP
Wisconsin	Foodshare Program/SNAP

- If you or any member of this household received benefits from the government to buy food for your family using a benefit card → select "Yes"

Help

Why We Ask?

We ask about whether a home is owned or rented, and the amount of the monthly rent or how much the home and property are worth to produce statistics about tenure, rent and home value. These statistics are used to analyze whether adequate housing is affordable for residents, property owners and renters, and provide and fund housing assistance programs.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used to describe the balance of owners and renters. State and Local governments receiving certain grants are required by law to use this information.
- Used to identify rental distribution of housing units used to determine Fair Market Rents (FMRs).

Examples of Other Uses

- States and counties use these statistics to understand changes in local housing markets, ensure residents have affordable housing options, qualify for assistance and grant programs designed for property owners and renters, and reduce the tax revenue losses from vacant or abandoned properties.
- Businesses and mortgage lenders use these statistics to guide future operations.

Help

Why We Ask?

We ask about whether a home is owned or rented, and the amount of the monthly rent or how much the home and property are worth to produce statistics about tenure, rent and home value. These statistics are used to analyze whether adequate housing is affordable for residents, protect owners and renters, and provide and fund housing assistance programs.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used to describe the balance of owners and renters. State and Local governments receiving certain grants are required by law to use this information.
- Used to identify rental distribution of housing units used to determine Fair Market Rents (FMRs).

Examples of Other Uses

- States and counties use these statistics to understand changes in local housing markets, ensure residents have affordable housing options, qualify for assistance and grant programs designed to protect owners and renters, and reduce the tax revenue losses from vacant or abandoned properties.
- Businesses and mortgage lenders use these statistics to guide future operations.

Help

Why We Ask?

We ask about the use and cost of common utilities, any applicable condominium fees, taxes, utilities, mortgages and home loans as part of the cost of homeownership. When combined with income, selected monthly owner costs help federal planners measure housing affordability and excessive shelter costs.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used to describe the housing cost burden. State and Local governments receiving certain grants are required by law to use this information.
- Used in many programs that seek to assess poverty, and determine eligibility for housing assistance programs, including the need for housing assistance for elderly, low-income households.

Examples of Other Uses

- States and local agencies use this information to estimate residential costs of energy consumption, improve energy efficiency in their communities, and develop affordable housing.
- Researchers use these statistics to investigate the costs of replacing conventional home heating fuels (including electricity) with renewable energy alternatives.

Help

- Enter monthly amount, even if unpaid or paid by someone else
- Enter zero for no regular payment required or for reverse mortgages
- Include payments on:
  - First mortgage
  - Contracts to purchase
  - Mobile home - Installment loans
- Do NOT include payments on:
  - Second mortgages
  - Junior mortgages
  - Home equity loans
  - Mobile home - Personal property taxes, site rent, registration fees, or license fees on mobile home and site

If mortgage is paid:	To convert to monthly amount:
By week	Multiply amount by 4
Every other week	Multiply amount by 2
4 times a year	Divide amount by 3
2 times a year	Divide amount by 6

Help

Why We Ask?

We ask about the highest grade of school or degree a person has completed, and the field of any Bachelor's degree, to produce statistics about educational attainment. These statistics are used to measure changes in education over time, evaluate the educational attainment of the workforce, and to identify the educational and training needs of adults.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used to enforce against discrimination in employment, recognizing that some occupations have educational qualifications.
- Used to enforce against discrimination in education by state and local governments, including ensuring appropriate action to assist English language learners, and monitoring desegregation.

Examples of Other Uses

- Researchers use this information to investigate changes in educational attainment over time and how it is related to other factors such as parents' education and health.

Help

- Select highest grade of school or degree person has COMPLETED.
- School completed in foreign or ungraded school → report equivalent level of schooling in regular American school system
- No college courses completed for credit → select highest grade or degree completed below college level
- If currently enrolled and the school year is in progress → select previous grade completed prior to this year.

Category:	Definition:
General Education Development (GED) or alternative credential	The person did not receive a regular high school diploma, BUT completed high school by receiving a GED or other formal recognition of high school completion from a school or government authority
Some college credit, but less than 1 year of college credit	The person has NOT completed enough college credit to be counted as a sophomore
Professional degree beyond a bachelor's degree	Do NOT include: • Certificates or diplomas for training in specific trades or occupations, such as computer and electronics technology, medical assistant, or cosmetology • Post-bachelor's certificates that are related to occupational training, such as teaching, accounting, or engineering

Help

Why We Ask?

We ask questions about whether a person moved in the last year, and where he or she lived one year ago to create statistics about where people are moving (among countries, and within the United States). These statistics help federal agencies understand the effects of immigration and migration in both urban and rural areas.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used to produce estimates of international migration.
- Used to provide funds to States with unusually large refugee populations and high refugee concentrations.

Examples of Other Uses

- State and local agencies use these statistics to estimate residential turnover in their communities and to forecast population changes.
- These statistics are used to plan programs, services, and infrastructure for new residents when there is a trend in people arriving, or to plan programs that attract new residents or employers when there is a trend in people leaving.

Help

Include:

- House or structure number;
- Street name;
- Street type (for example, St., Road, Ave.);
- Street direction (if a direction such as "North" is part of the address).
  - For example, enter 1239 Main St. or 1239 Main St., N.W., not just 1239 Main.

Address:

If:	Then:
Lived in Puerto Rico	Address should also include name of development or condominium

Only known address is a post office box	• Do NOT give a post office box number
	• Give description of residence location. For example, enter:
	  • Name of the building where the person lived
	  • Nearest intersection
	  • Name of military base or installation
	  • Nearest street where residence located

Name of U.S. county or municipio in Puerto Rico:

If:	Then:
Lived in Louisiana	Enter parish name
Lived in Alaska	Enter borough or census area name, if known
Lived in New York City AND county name is not known	Enter borough name
Lived in independent city (not in any county)	Leave blank
Lived in Washington, D.C.	Leave blank

Help

Why We Ask?

We ask about a person's military service to create estimates of veterans and their needs at the community level. Though the Department of Veterans Affairs (VA) maintains veterans' records, ACS statistics are able to provide federal program planners, policy-makers and researchers with additional statistics about all veterans, regardless of whether they utilize VA services. Statistics about where veterans are moving throughout the country, their ages, and their VA service-connected disability rating status, help communities plan for future health care and nursing homes. Statistics about whether veterans are in school or working help plan and fund job training, and statistics about veterans' homes help improve the home loan guarantee program.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used to estimate the number of nursing home and domiciliary beds necessary for VA extended care services to serve older veterans.
- Used to assess the eligible population for federal programs benefiting veterans, such as the VA Home Loan Guarantee program, the Post-9/11 GI Bill, health care and job training, and the effect of these programs on participants.

Examples of Other Uses

- State and local agencies use these statistics to determine what kinds of social services might be needed in a community.
- Businesses may use these estimates to understand potential employees or trainees.

Help

If:	Then select:

• Served in the military Reserves, or National Guard, **AND** called up for active duty other than for training
• Served as a commissioned officer of the:
  • Public Health Service
  • National Oceanic and Atmospheric Administration
  • Coast and Geodetic Survey
  • Environmental Science Service Administration
	"Now on active duty."
	OR
	"On active duty in the past, but not now."

Civilian employee or volunteer for: • Red Cross • USO • Public Health Service • War or Defense Department	"Never served in the military."
World War II Merchant Marine service	"On active duty in the past, but not now."
Merchant Marine service other than World War II	"Never served in the military" OR "Only on active duty for training in the Reserves or National Guard."

Help

Why We Ask?

We ask questions about where people work, how they get there, when they leave, and how long it takes, to create statistics about commuting, or a person's journey to work. This information is crucial for planning improvements to the Nation's transportation systems, such as roads, bridges, and transit networks.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used in transportation planning to ensure compliance with various Federal regulations.
- Used to forecast an area's workforce size and density, predict peak travel demand on roads, bridges, and transit systems, and plan emergency response routes.
- Used to protect against employment discrimination through the Equal Employment Opportunity Act (EEO).
- The Office of Management and Budget's (OMB's) uses information about where people work to delineate the nation's metropolitan and micropolitan areas. These areas are used by Federal statistical agencies in collecting, tabulating, and publishing Federal statistics.

Examples of Other Uses

- State Departments of Transportation and regional planning agencies use commuting information for long range transportation planning and travel demand forecasting.
- Planning bodies use this information to address unmet transportation needs such as services for the physically disabled population and programs to promote a diverse set of travel options such as bicycling, walking, and transit.

Help

Include:

- Building or structure number;
- Street name;
- Street type (for example, St., Road, Ave.);
- Street direction (if direction such as "North" is part of the address);
  - For example, type 1239 N. Main St. or 1239 Main St., N.W., not just 1239 Main

If:	Then:
Only known address is post office box	• Do NOT give a post office box number • Enter description of work location, such as name of building or shopping center, nearest intersection, or nearest street
Worked at military installation or military base that has no street address	Enter name of military installation or base, AND enter description of work location, such as building number, building name, nearest street or intersection
Worked at several locations, but reported to same location each day to begin work	Enter street address of location reported
Worked at several locations, but did NOT report to same location each day to begin work	Enter address of location worked most of the time last week
Employer operates in more than one location, such as: • Grocery store chain • Public school system	• Enter street address of location or branch where worked • If street address of a school is not known, enter name of school, AND description of location, such as nearest street or intersection
Person worked on a college or university campus AND street address of the workplace is not known	Enter name of building where worked, AND description of location, such as nearest street or intersection

Help

Why We Ask?

We ask questions about where people work, how they get there, when they leave, and how long it takes, to create statistics about commuting, or a person's journey to work. This information is crucial for planning improvements to the Nation's transportation systems, such as roads, bridges, and transit networks.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used in transportation planning to ensure compliance with various Federal regulations.
- Used to forecast an area's workforce size and density, predict peak travel demand on roads, bridges, and transit systems, and plan emergency response routes.
- Used to protect against employment discrimination through the Equal Employment Opportunity Act (EEO).
- The Office of Management and Budget's (OMB's) uses information about where people work to delineate the nation's metropolitan and micropolitan areas. These areas are used by Federal statistical agencies in collecting, tabulating, and publishing Federal statistics.

Examples of Other Uses

- State Departments of Transportation and regional planning agencies use commuting information for long range transportation planning and travel demand forecasting.
- Planning bodies use this information to address unmet transportation needs such as services for the physically disabled population and programs to promote a diverse set of travel options such as bicycling, walking, and transit.

Help

- Worked on a farm where he or she lives → select "Worked from home"
- Worked in an office or shop in the person's own home → select "Worked from home"
- If different modes are used on different days → select mode used on most of the days

If person rode:	Then select:
• Company car • Rental car service (including short-term car share) • Truck cab • Truck (light) of 1-ton capacity or less	Car, truck, or van
• Local Bus • Intercity bus • Regional bus service • Bus rapid transit	Bus
• Underground or elevated local rail network (e.g. New York City subway, Chicago "L", Washington DC Metro, San Francisco BART)	Subway or elevated rail
• National rail network (i.e. Amtrak) • Regional rail networks (i.e. Long Island Rail Road, Metra, SEPTA, Caltrain, MARC)	Long-distance train or commuter rail
• Monorail • Vehicles that operate on tracks or rails, often with overhead electrical wires	Light rail, streetcar, or trolley
• Cab • Uber • Lyft • Other on-demand ride-hailing service (individual or shared, including app-based)	Taxi or ride-hailing services
• Moped • Seat motor scooter • Similar motor-driven vehicle	Motorcycle
• Seated vehicle that is pedaled • Electric assist bicycle • Bicycle sharing service or system	Bicycle
• Airplane • All-Terrain Vehicle (ATV) • Boat (other than ferry) • Dogsled • Helicopter • Horse (with or without buggy) • Inline skates • Motor home • Motorized chair • Scooter (upright, including electric or motorized) • Self-balancing electric vehicle • Skateboard • Snow machine/snowmobile	Other method

Help

Why We Ask?

We ask about whether a person was a private employee, government employee, self-employed, or working without pay in a family business, to produce statistics about class of worker. These statistics are used to understand more about the type of ownership of employing organizations, to plan and measure education, employment, career development and job training programs, and to measure compliance with antidiscrimination policies.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used to support cooperative agricultural extension work.
- Used to enforce against discrimination in employment by private employers, government agencies, and labor organizations. Used in federal affirmative employment programs, to identify underrepresentation in job categories, including veterans and people with disabilities.

Examples of Other Uses

- State and local agencies use these statistics to identify the percentage of people employed full-time, and the percentage of residents who work in each community year-round.

Help

If worked for:	Then select:
• Department store • Restaurant • Automobile dealer • National investment firm	**For-profit** company or organization
• Cooperative • Credit union • Mutual insurance company	**Non-profit** organization (including tax exempt and charitable organizations)
• County-run community college • City-run public school • City-owned bus lines	**Local government** (for example: city or county school district)
• State university • State police	**State government** (including state colleges/universities)
• Armed Forces, regular service • U.S. Public Health Service or NOAA Commissioned Corps • Military Reserves AND called to service by military order (not weekend training)	**Active duty** U.S. Armed Forces or Commissioned Corps
• Foreign government • United Nations	**Federal government** civilian employee
• Profit or fees in his or her own business, farm, office, etc. • Sole proprietorships and partnerships, but the company is not incorporated	**Owner of non-incorporated** business, professional practice, or farm
• Own business or organization which was a legal entity created by filing documents with the local secretary of state, commissioner of corporations, or similar official	**Owner of incorporated** business, professional practice, or farm
• Worked on a farm or in a business operated by a relative. • This category only applies to workers in the family business or farm, not the owners. • The work does not include housework or yard work at home, caring for a family member, unpaid volunteer work or unpaid internships. • If the worker receives money, which is considered wages for work, do not assign this category.	Worked **without pay in a for-profit** family business or farm for 15 hours or more per week

Help

Why We Ask?

We ask about a person's employer, the kind of business or industry of that employer, the work a person was doing, and that person's most important duties at that job to produce industry and occupation statistics. These statistics are used to understand more about the labor force, to plan and measure education, employment, career development and job training programs, and to measure compliance with antidiscrimination policies.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used to enforce against discrimination in employment by private employers, government agencies, and labor organizations. Used in federal affirmative employment programs, to identify underrepresentation in job categories and specific occupations.
- Used to help make other federal surveys more accurate, including those that produce the nation's official labor market estimates.

Examples of Other Uses

- Used by Federal, State and local agencies to identify the demand of specific occupational categories by geographic areas.
- Used by companies to decide where to locate new plants, stores, or offices.

Help

If worked for:	Then enter:
• Company • Business • Government agency	Name of company, NOT name of person's supervisor
• Individual or business that had no company name	Name of individual this person worked for

American Community Survey

The next few questions are about Sample Respondent's income during the PAST 12 MONTHS.

For each type of income Sample Respondent received, give your best estimate of the TOTAL AMOUNT during the PAST 12 MONTHS. (NOTE: The "past 12 months" is the period from today's date one year ago up through today.)

For income received jointly, report the appropriate share for each person – or, if that's not possible, report the whole amount for only one person and select "No" for the other person.

Did Sample Respondent receive any wages, salary, commissions, bonuses, or tips during the PAST 12 MONTHS?

○ Yes

○ No

Help

Why We Ask?

We ask questions about the funds a person receives from various sources to create statistics about income, earnings, and poverty. These estimates measure the economic well-being of the nation. Income and poverty estimates are often part of allocation formulas that determine how food, health care, job training, housing and other assistance are distributed.

- Click Here to Collapse Additional Text

Examples of Federal Uses

- Used in formulas that provide funding to populations with the greatest need (such as children and seniors).
- Used to understand the characteristics of people living at or below the poverty line. These estimates are then used to set eligibility requirements for individuals, governments, and organizations seeking funding for education, housing assistance, health care, food assistance, legal services, and many other programs.

Examples of Other Uses

- States and counties use these statistics to identify local areas eligible for grants to stimulate economic recovery, run job-training programs, and define areas as empowerment or enterprise zones.
- States and counties also use this information to assist children in poverty, and to provide funds to counties and school districts for resources and services that improve the education of economically disadvantaged children.

Help

If person received:	Then select:

• Wages and salaries before deductions from ALL jobs
• Tips
• Commissions
• Bonuses
• Salary from incorporated businesses
• Sick leave pay
• Vacation pay
• Director fees
• Severance pay
• Assistantships and teaching fellowships
• Piece-rate
• Military personnel:
  • Base pay
  • Cash housing and/or subsistence allowance
  • Flight pay
  • Uniform allotments
  • Reenlistment bonuses
  • Armed forces or national guard pay
	Yes

Examples of Federal Uses

- Used in formulas that provide funding to populations with the greatest need (such as children and seniors).
- Used to understand the characteristics of people living at or below the poverty line. These estimates are then used to set eligibility requirements for individuals, governments, and organizations seeking funding for education, housing assistance, health care, food assistance, legal services, and many other programs.

Examples of Other Uses

- States and counties use these statistics to identify local areas eligible for grants to stimulate economic recovery, run job-training programs, and define areas as empowerment or enterprise zones.
- States and counties also use this information to assist children in poverty, and to provide funds to counties and school districts for resources and services that improve the education of economically disadvantaged children.

Help

If income received jointly by household members:

- If possible, report appropriate share for each person
- If not possible, report whole amount for one person AND select "No" for other person

If person received:	Then select:

• Unemployment compensation
• Veterans' (VA) disability compensation
• Veterans' educational assistance payments (VEAP)
• Child Support
• Alimony
• Other regular payments, such as:
  ◦ Armed Forces transfer payments
  ◦ Assistance from private charities
  ◦ Regular contributions from persons not living in the household
	Yes

Help

Why We Ask?

We ask questions about the funds a person receives from various sources to create statistics about income, earnings, and poverty. These estimates measure the economic well-being of the nation. Income and poverty estimates are often part of allocation formulas that determine how food, health care, job training, housing and other assistance are distributed.

document_accessibility

V. Accessibility

The U.S. Census Bureau is committed to providing accessible Information and Communication Technology (ICT) to individuals with disabilities, including members of the public and federal employees, by meeting or exceeding the requirements of Section 508 of the Rehabilitation Act of 1973. In addition, the Census Bureau is also committed to ensuring accessibility of our buildings and facilities as required by the Architectural Barriers Act, 42 U.S. Code 4151 through 4157.

Section 508 of the Rehabilitation Act of 1973, as Amended (29 U.S. Code 794d)

Section 508 of the Rehabilitation Act of 1973, as amended, requires agencies, during the procurement, development, maintenance, or use of ICT, to ensure that individuals with disabilities have access to and use of ICT information and data comparable to the access and use afforded to individuals without disabilities (i.e., ICT accessibility), unless an undue burden would be imposed on the agency. More information on Section 508 and the technical standards can be found at www.section508.gov.

If you have feedback, questions, or concerns relating to the accessibility of any content that interferes with your ability to access the information on the Census Bureau's Web site, please contact (301)763-1508 or e-mail census.508.accessibility@census.gov for assistance.

If you believe that the ICT used by the Census Bureau does not comply with Section 508 of the Rehabilitation Act, you may file a Section 508 complaint by contacting the Census Bureau Accessibility Section 508 Program office at (301)763-1508 or census.508.accessibility@census.gov.

To enable us to respond in a manner most helpful to you, please indicate the nature of your accessibility problem, the preferred format in which to receive the material, the Web address (URL) of the material with which you are having difficulty, and your contact information.

Links to Third Party Web sites

Some pages on this Web site may contain links to third party sites not operated by the Census Bureau. These sites may not adhere to similar privacy, security, or accessibility policies and standards. The Census Bureau is not responsible for the content and accessibility of those sites, their partners, or advertisers.

Architectural Barriers Act of 1968 (42 U.S. Code §§ 4151–57)

The Architectural Barriers Act (ABA) requires access to facilities that are designed, built, altered, or leased with federal funds. The Access Board is the federal agency responsible for enforcing the ABA. The Access Board's accessibility standards are available on their Web site at www.access-board.gov/guidelines-and-standards/buildings-and-sites/about-the-aba-standards, and information about filing a complaint may be found at www.access-board.gov/aba-enforcement/file-a-complaint.

To allow us to better serve those with visual disabilities who are having difficulty accessing PDF documents; you may contact us directly for further assistance at 301-763-INFO (4636), 800-923-8282, or by submitting a request at ask.census.gov.

VI. Third Party Web Sites and Applications

The Census Bureau has a presence on several social media/Web 2.0 platforms (Facebook, YouTube, Twitter and Pinterest, and other third-party services)) and clearly contain the Census Bureau's official logo. Each of these web sites provides the Census Bureau unique ways of sharing information. It also allows visitors with a way to communicate with the agency. Some may allow visitors to log in, create profiles and save information in those profiles. We do not collect any personally identifiable information about you through your use of these social media/Web 2.0 platforms. We may collect public information, such as user/screen name, city, state, and zip code of

VI. Third Party Web Sites and Applications

The Census Bureau has a presence on several social media/Web 2.0 platforms (Facebook, YouTube, Twitter and Pinterest, and other third-party services)) and clearly contain the Census Bureau's official logo. Each of these web sites provides the Census Bureau unique ways of sharing information. It also allows visitors with a way to communicate with the agency. Some may allow visitors to log in, create profiles and save information in those profiles. We do not collect any personally identifiable information about you through your use of these social media/Web 2.0 platforms. We may collect public information, such as user/screen name, city, state, and zip code of visitors to these web sites, and comments posted about the Census Bureau for statistical, research, and promotional purposes only. Further, the Census Bureau has no control over the third-party's use of this information and is not liable regarding the third-party's safeguarding your information. These web sites have their own privacy, security and accessibility policies.

The Census Bureau will also use a third-party web site or application (hosted service) to conduct customer satisfaction surveys and/or feedback forms. These surveys and/or feedback forms may collect your name and email address for processing purposes. The results from these surveys or forms are used to conduct primary research into the quality of the Census Bureau programs and products. The results collected will be used strictly for internal program management purposes to assess staff work, material design and development and to enhance planning efforts for current and future surveys and censuses. In addition, other third-party web sites or applications may be used to host Census Bureau data products to be used by the public. These web sites do not require the use of personally identifiably information or business identifiable information.

VII. Security & Third Party Links

A. Security, Intrusion, and Detection

To ensure that computer service remains available to all users, this government IT system employs software programs to monitor network traffic to identify unauthorized attempts to upload or change information, or otherwise cause damage to our computer system. Web sites identified as representing an actual or potential security threat to Census Bureau information and/or information resources are blocked. Further, web sites that are known to violate Census Bureau, Department of Commerce, and/or Federal guidelines regarding access to certain types of web sites and/or content are blocked, for example:

- Web sites hosting malware/spam
- Web sites involved in the compromise of other government agencies
- Adult content web sites
- On-line storage and file sharing web sites
- Freeware/Shareware web sites
- Web sites attacking Census Bureau systems (attempting to identify and exploit vulnerabilities in Internet facing systems)
- Web sites scanning Census Bureau systems (attempting to identify Internet facing systems)

B. Links to Other Web Sites

Our web site contains links to other federal agencies, international agencies, and private organizations. Once you link to another web site, you are subject to the policies of the new web site.

Links to non-government websites are denoted by ⧁. Our linking to non-government web sites does not constitute an endorsement of any products, services or the information found on them.

VIII. Contact Us

Need more information about the Census Bureau's privacy and confidentiality protections? Contact our Chief Privacy Officer at 301-763-6440 or toll-free at 1-800-432-1494.
