General Comment

these survey do not take proper account of those populations in the United States who are wildlife watchers. they are diminished in scope and size because hunters control the spending the huge billions spent on this pal publishing company of the hunters and killers of wildlife. this came company has been used for eons now and they know the score. find for hunters - make up numbers if you have to to find more hunters than are out there and list them but forget about and diminish wildlife watchers. this agency is corrupt as can e since it only works for wildlife killers and trappers and profiteers who make money from fur sales of dead bodies of animals. the whole thing is a scam on the American people. get a new company to do a fair survey and don't manufacture qhe questions to be biased as they are. you can get any results you want from a survey if you bolster the questions to get answers you are trying to get the public is being scammed
