MyTSA PreCheck ID

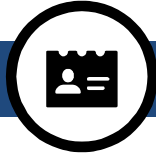

Process Flow (Notional) for TSA PreCheck Application Program Members

TSA PreCheck-Issued Digital ID

When enrolling for a digital ID, members voluntarily provide their PII to TSA for proofing and verification.

Member downloads app and begins enrollment process.

Member provides data needed to confirm that they have an active KTN - first name, middle name, last name, date of birth, country of birth, KTN (optional).

Member captures a photo (selfie) to detect liveness and verify their linkage to the relevant data.

The relevant data is submitted to TSA for confirmation of active TSA PreCheck membership and retrieval of enrollment and/or US passport photo*.

- If enrollment photo exists, 1:1 match is performed between selfie.
- Otherwise, 1:1 match is performed with passport photo.

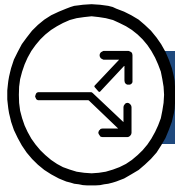

After confirmation of identity and verification that the member is not on any exclusion lists, TSA issues and provisions a digital ID to the member's device, and member will have the TSA PreCheck Digital ID stored locally in their device.

**Eligible members will be asked if they would like to opt in to TSA PreCheck Touchless ID*

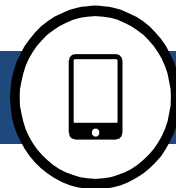

* There are 22.8M TSA PreCheck Application Program Members, of which there are approximately 1.1M individuals that have neither an enrollment photo or US passport photo on file. These individuals would not be able to obtain a TSA PreCheck Digital ID until a remote photo capture capability is developed.

Process Flow (Notional) at the Checkpoint

TSA PreCheck Member Identity Verification Experience

Member proceeds to the TSA PreCheck lane, or to TSA PreCheck Touchless ID lane, if opted in, where digital ID is not required beyond this point.

Member presents digital ID at the TDC and transmits required data elements with the edge device.

Edge device captures a live photo of the member for a 1:1 biometric match against the photo associated with the digital ID.

TSA confirms member's TSA PreCheck® valid active KTN status and verifies the authenticity of the digital ID.

TSO directs member to TSA PreCheck screening lane.

Statement of Public Burden: This is a voluntary collection of information, but failure to provide the information may result in an inability to approve your eligibility for the requested TSA program or benefit. TSA estimates that the total average burden per response associated with this collection is approximately 5 minutes. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The control number for the collection is OMB 1652-0059, which expires Month xx, 20xx. Send comments regarding our estimate or any other aspect of this collection, including suggestions for reducing burden, to DHS/TSA, TSAPRA@tsa.dhs.gov or TSA-11, Transportation Security Administration, 6595 Springfield Center Drive, Springfield, Virginia 20598-6011. Attn: PRA 1652-0059 TSA PreCheck Application.
