The registration process for SAPs, MROs, and TPAs really needs to be monitored. I know that something new has been implemented for SAPs and that is wonderful. The fact that over 23,000 TPA's are registered is absolutely, positively incorrect. As a TPA, I know there are multiple records of our business in the Clearinghouse that someone (besides us) setup. It will take man power to confirm TPAs, but it is absolutely necessary. Also, the SAPs should be able to enter the follow up plan and TPAs/Employers should be able to see that plan and upload test results that satisfy the plan. This will ensure the plan is completed and will solve the issue of an employee/employer trying to obtain a SAP plan from a SAP that is not in the indrustry any longer.
