

Response to Public Comments
Medicaid Drug Rebate Program Labeler Reporting Format
CMS-367a – e; OMB 0938-0578

We received several submissions from the same commenter that we understood to be raising concerns related to the accuracy of CMS's published burden estimates. All ICRs are reviewed by the Office of Management and Budget (OMB) for accuracy and legal sufficiency. We have included information regarding the use and burden associated with the referenced information collections in the notice and in each collection's supporting statement and associated materials.
