

**1SUPPORTING STATEMENT A FOR
PAPERWORK REDUCTION ACT SUBMISSION**

**Depredation and Control Orders Under 50 CFR 21, Subpart D
OMB Control Number 1018-0146**

Terms of Clearance: None.

1. Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection.

The Migratory Bird Treaty Act (MBTA; 16 U.S.C. 703 et seq.) implements four treaties concerning migratory birds signed by the United States with Canada, Mexico, Japan, and Russia. These treaties require that we conserve most U.S. species of birds, and prohibit activities involving migratory birds, except as authorized by regulation. Under the MBTA, it is unlawful to take, possess, import, export, transport, sell, purchase, barter—or offer for sale, purchase, or barter—migratory birds or their parts, nests, or eggs, except as authorized by regulation. This information collection is associated with our regulations that implement the MBTA. We collect information concerning depredation actions to determine the number of birds of each species taken each year and whether the control actions are likely to affect the populations of those species.

Regulations at subpart D, “*Provisions for Depredating, Overabundant, or Otherwise Injurious Birds*”, impose reporting, recordkeeping, and/or notification requirements subject to Office of Management and Budget (OMB) approval under the Paperwork Reduction Act (PRA; 44 U.S.C. 3501 et seq.):

- §21.150 Depredation order for blackbirds, cowbirds, crows, grackles, and magpies;*
- §21.153 Depredation order for horned larks, house finches, and white-crowned sparrows in California;*
- §21.156 Depredation order for depredating California scrub jays and Steller's jays in Washington and Oregon;*
- §21.159 Control order for resident Canada geese at airports and military airfields;*
- §21.162 Depredation order for resident Canada geese nests and eggs;*
- §21.165 Depredation order for resident Canada geese at agricultural facilities;*
- §21.168 Public health control order for resident Canada geese;*
- §21.171 Control order for purple swamphens;*
- §21.174 Control order for muscovy ducks in the United States;*
- §21.177 Control order for invasive migratory birds in Hawaii;*
- §21.180 Conservation order for light geese; and*
- §21.183 Population control of resident Canada geese.*

2. Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection. Be specific. If this collection is a form or a questionnaire, every question needs to be justified.

Form 3-2436, “Depredation and Control Orders – Annual Reporting”

The capture and disposition of all nontarget migratory birds, including endangered, threatened, or candidate species must be reported on Form 3-2436, Annual Report. In addition to the name,

address, phone number, and email address of each person or entity operating under the order, we collect the following information for each target and nontarget species taken:

- Species taken;
- Number of birds taken;
- Method of take;
- Months and years in which the birds were taken;
- State and county in which the birds were taken;
- General purpose for which the birds were taken (such as for protection of agriculture, human health and safety, property, or natural resources); and
- Disposition of nontarget species (released, sent to rehabilitation facilities, etc.)

We use the information to:

- Identify the person or entity acting under depredation orders;
- Assess the impact to nontarget migratory birds or other species;
- Ensure that agencies and individuals operate in accordance with the terms, conditions, and purpose of the orders;
- Inform us as to whether there are areas in which control activities are concentrated and might be conducted more efficiently; and,
- Help gauge the effectiveness of the depredation and control orders at mitigating order-specific related damages.

Recordkeeping Requirements

Persons and entities operating under these orders must keep accurate records to complete Form 3–2436. The records of any taking must be legibly written or reproducible in English and maintained for five years after the persons or entities have ceased the activity authorized by this order. Persons or entities who reside or are located in the United States and persons or entities conducting commercial activities in the United States who reside or are located outside the United States must maintain records at a location in the United States where the records are available for inspection.

Endangered, Threatened, and Candidate Species Take Report

If activities conducted under a depredation or control order take a bird of a nontarget species that is federally listed as endangered or threatened, or that is a candidate for listing, under the Endangered Species Act (ESA; 16 U.S.C. 1531 et seq.), the bird must be delivered to a rehabilitator and must be reported by phone or email to the nearest Service Field Office or Special Agent. Capture and disposition of all nontarget migratory birds must also be reported on the annual report.

Required Notifications

- §21.150 – Report take of nontarget federally protected migratory birds to the nearest Service Field Office or Special Agent.
- §21.159 – Airports and military airfields or their agents must obtain authorization from landowners for all management activities conducted outside the airport or military airfield's boundaries.
- §21.159 – Airports and military airfields or their agents operating under this order must immediately report the take of any species protected under the ESA to the Service.

- §21.159 – To protect certain species from being adversely affected by management actions, airports and military airfields or their agents must contact the Service if control activities are proposed in or around occupied habitats to discuss the proposed activity and ensure that implementation will not adversely affect protected species or their habitat.
- §21.159 – Information on birds carrying metal leg bands must be submitted to the Bird Banding Laboratory by means of a toll-free telephone number at 1–800–327–BAND (or 2263) (U.S. Geological Survey OMB Control Number 1028–0082).
- §21.162 – Homeowners' associations and local governments or their agents must obtain landowner consent prior to destroying nests and eggs on private property within the homeowners' association or local government's jurisdiction and comply with all State and local laws and regulations.
- §21.162 – Registrants operating under this order must immediately report the take of any species protected under the ESA to the Service.
- §21.162 – To protect certain species from being adversely affected by management actions, registrants must contact the Service if control activities are proposed in or around occupied habitats to discuss the proposed activity and ensure that implementation will not adversely affect protected species or their habitat.
- §21.165 – Authorized individuals operating under this section must immediately report the take of any species protected under the ESA to the Service.
- §21.165 – Information on birds carrying metal leg bands must be submitted to the Bird Banding Laboratory by means of a toll-free telephone number at 1–800–327–BAND (or 2263) (U.S. Geological Survey OMB Control Number 1028–0082).
- §21.168 – Information on birds carrying metal leg bands must be submitted to the Bird Banding Laboratory by means of a toll-free telephone number at 1–800–327–BAND (or 2263) (U.S. Geological Survey OMB Control Number 1028–0082).
- §21.168 – States and Tribes operating under this order must immediately report the take of any species protected under the ESA to the Service.
- §21.168 – To protect certain species from being adversely affected by management actions, States and Tribes must contact the Service if control activities are proposed in or around occupied habitats to discuss the proposed activity and ensure that implementation will not adversely affect protected species or their habitat.
- §21.171 – Authorized individuals operating under this order must immediately report the take of any other species protected under the ESA, the MBTA, or the Bald and Golden Eagle Protection Act to the nearest Ecological Services office.
- §21.174 – Authorized individuals operating under this order must immediately report the take of any species protected under the ESA, or any other bird species protected under the MBTA, to the Service Ecological Services office for the State or location in which the take occurred.

- §21.177 – Authorized personnel must obtain authorization from landowners prior to conducting management activities authorized by this order.
- §21.177 – Authorized individuals operating under this order must immediately report the take of any nontarget species protected under the ESA or MBTA within 72 hours of take to the Pacific Region Migratory Bird Permit office in Portland, Oregon.
- §21.183 – Authorized individuals operating under this section must immediately report the take of any species protected under the ESA to the Service.

Access to Depredation and Control Efforts (50 CFR 21.150, 21.156, 21.168, 21.180, 21.183)

Persons acting under the authority of these orders must permit at all reasonable times, including during actual operations, any Federal or State game or deputy game agent, warden, protector, or other game law enforcement officer free and unrestricted access over the premises on which such operations have been or are being conducted and must promptly furnish whatever information an officer requires concerning the operation.

Canada Geese Nest and Egg Depredation Order (50 CFR 21.162)

In addition to the requirements listed above, landowners operating under this order must:

- Register with the Service using our web-based registration system (<https://epermits.fws.gov/eRCGR>) (§21.162(d)(1)). Registration includes name of landowner, names of designated agents, location of management activities, and contact information. The registration is valid for 1 year; the registrant must renew the registration each year he or she wishes to take nests and eggs. To renew the registration, the registrant must review the information and certify that it is correct. If any information entered during initial registration has changed, the registrant needs to enter only the revised information. We use this information for enforcement purposes and to contact registrants when there are questions regarding their report information. We uploaded screen shots of the registration web site and a copy of the user guide as supplementary documents available at <https://www.reginfo.gov/public/do/PRAMain>.
- Complete an annual report summarizing the date (month), numbers, and locations of nests and eggs taken by October 31 (§21.162(d)(6)). We use this information to monitor the effectiveness of the program and the cumulative effect of the take of nests and eggs on various subpopulations of resident Canada goose populations in different areas of the country. We distribute reports of the numbers of nests and eggs taken, by State and county, annually to the States, Flyway Councils, and Service biologists for their use in determining allowable take by other methods, including hunting seasons. We now also include this information on the registration web site.

Agricultural Depredation Order (50 CFR 21.165)

In addition to the requirements listed above:

- Recordkeeping Requirement (Private Sector Only) – Authorized agricultural producers must:
 - o Keep and maintain a log that indicates the date and number of birds killed and the date and number of nests and eggs taken under this authorization;
 - o Maintain the log for a period of three years (and records for three previous years of takings at all times thereafter); and
 - o Make the log and any related records available to Federal, State, or Tribal wildlife enforcement officers (§21.165(d)(8)).
- Reporting Requirement (States and Tribes Only) – States and Tribes must submit by

December 31 an annual report summarizing activities, including the numbers of birds, nests, and eggs taken and county where taken (§21.165(d)(10)). We use this information to monitor the resident Canada goose populations in different areas of the country.

Conservation Order for Light Geese (50 CFR 21.180)

These regulations require States and Tribes to keep annual records of activities carried out under the authority of the conservation order and submit an annual report summarizing activities conducted under the conservation order on or before September 15 of each year. Specifically, information must be collected on:

- The number of persons participating in the conservation order;
- The number of days people participated in the conservation order;
- The number of light geese shot and retrieved under the conservation order; and
- The number of light geese shot but not retrieved.

Population Control of Resident Canada Geese (50 CFR 21.183)

In addition to the requirements listed above, States and Tribes:

- May request approval for the population control program. Requests must include a discussion of the State's or Tribe's efforts to address its injurious situations or a discussion of the reasons why the methods authorized by these regulations are not feasible for dealing with, or applicable to, the injurious situations that require further action. Requests must provide detailed information of the injuries that continue, why the authorized methods have not worked, and why methods not utilized could not resolve the injuries (§21.183(d)). This information is necessary for us to assess whether or not the program should be authorized.
- Must keep annual records of activities carried out under the authority of the program. Specifically, information must be collection on:
 - o The number of individuals participating in the program;
 - o The number of days each individual participated in the program;
 - o The total number of resident Canada geese shot and retrieved during the program; and
 - o The number of resident Canada geese shot but not retrieved (§21.183(d)(7)). We use this information, in conjunction with take under other methods and hunting seasons, to determine cumulative impacts on the various goose populations.
- Must submit by June 1 an annual report summarizing activities conducted under the program and an assessment of the continuation of injuries (§21.183(d)(7)(iv)). We use this information to determine if we should continue to authorize program activities.
- Must provide by August 1 an annual estimate of the breeding population and distribution of resident Canada geese in their State (§21.183(g)). We use this information to monitor the impacts of this program, as well as other authorized activities, on the population and to determine if we should continue to authorize program activities.

3. Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses, and the basis for the decision for adopting this means of collection. Also describe any consideration of using information technology to reduce burden and specifically how this collection meets GPEA requirements.

Those who undertake control activities under these regulations must submit an annual report (FWS Form 3-2436). The form is available on the Service's website in a fillable format (<http://www.fws.gov/forms/>). We will not require that respondents use the form, but they must

submit the required information (larger entities often export from their own databases.). Respondents may submit reports electronically by email, through the mail, or via ePermits (see below). We anticipate the following electronic submissions of the Annual Report (not via ePermits):

- Individuals and private sector categories – 50%
- Government category – 75%

ePermits – We continue to develop our automated permit application system, referred to as “ePermits.” ePermits allows the agency to move towards a streamlined permitting process to more significantly reduce the information collection burden on the public, particularly small businesses. Public burden reduction is a priority for the Service; the Assistant Secretary for Fish, Wildlife, and Parks; and senior leadership at the Department of the Interior. The intent of ePermits is to fully automate the permitting process to improve the customer experience and to reduce time burden on respondents. This system enhances the user experience by allowing users to enter data from any device that has Internet access, including PCs, tablets, and smartphones. It also links the permit applicant to the Pay.gov system for payment of any associated permit application fees.

We also plan to eliminate the necessity for physical mail-in applications and associated reporting requirements (though this will remain an option for those who either don’t have access to the internet or prefer to submit forms manually), thus further reducing the burden on the public. With ePermits, an applicant can establish an account, apply for multiple permits through a single interface, and track all their applications, permits and permit-related actions as well as all communications between Service staff and the permittee/applicant within the same interface, significantly reducing the burden on the government to process these applications and manage permit-related actions.

Geese Requirements – Participating States/Tribes develop their own methodology for collecting information for the light goose conservation order. States may submit the information electronically via email. Allowing States/Tribes to submit their reports electronically reduces administrative burden to respondents and the Federal government. We currently summarize data collected for all three Flyways that harvest light geese. Tables of summarized data are provided to participating States. We estimate that 5% of individuals/households and 80% of State/Tribal governments will utilize electronic submission.

We have an electronic registration and reporting website (<https://epermits.fws.gov/eRCGR>) for landowners operating under the nest and egg depredation order (50 CFR 21.50) as the sole information collection method. All phases of the site development are complete, including summaries of the data collected, which are available to the general public on the site’s login page. For all other activities associated with this ICR, we accept responses electronically (email), by fax, or by regular mail. We anticipate receiving nearly 100% of responses electronically.

4. Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above.

No other agency has the authority to regulate take of migratory birds, and the information we propose to collect is not being gathered elsewhere.

5. If the collection of information impacts small businesses or other small entities, describe any methods used to minimize burden.

This collection will not have a significant impact on small entities. We collect only the minimum information necessary to manage these migratory birds.

6. Describe the consequence to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.

Not collecting the information would not affect the depredation order. However, we need the information to assess the take on the species included under this depredation order and determine if some species should be removed from this order.

7. Explain any special circumstances that would cause an information collection to be conducted in a manner:

- * requiring respondents to report information to the agency more often than quarterly;
- * requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;
- * requiring respondents to submit more than an original and two copies of any document;
- * requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records, for more than three years;
- * in connection with a statistical survey that is not designed to produce valid and reliable results that can be generalized to the universe of study;
- * requiring the use of a statistical data classification that has not been reviewed and approved by OMB;
- * that includes a pledge of confidentiality that is not supported by authority established in statute or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or
- * requiring respondents to submit proprietary trade secrets, or other confidential information, unless the agency can demonstrate that it has instituted procedures to protect the information's confidentiality to the extent permitted by law.

Other than the items listed below, there are no other circumstances that require us to collect the information in a manner inconsistent with OMB guidelines:

- Persons and entities operating under depredation and control orders must report take of birds listed as Threatened, Endangered, or are Candidates for Listing prior to reporting this take on their Annual Report.
- The regulation at 50 CFR 13.46, maintenance of records, requires records to be kept for a period of five years.
- Accidental take of any species protected under the ESA, the MBTA, or the Bald and Golden Eagle Protection Act must be immediately reported to the Service.

8. If applicable, provide a copy and identify the date and page number of publication in the Federal Register of the agency's notice, required by 5 CFR 1320.8(d), soliciting comments on the information collection prior to submission to OMB. Summarize public comments received in response to that notice and in response to the PRA statement associated with the collection over the past three years, and describe actions taken by the agency in response to these comments. Specifically address comments received on cost and hour burden.

Describe efforts to consult with persons outside the agency to obtain their views on the availability of data, frequency of collection, the clarity of instructions and recordkeeping, disclosure, or reporting format (if any), and on the data elements to be recorded, disclosed, or reported.

Consultation with representatives of those from whom information is to be obtained or those who must compile records should occur at least once every three years — even if the collection of information activity is the same as in prior periods. There may be circumstances that may preclude consultation in a specific situation. These circumstances should be explained.

On April 1, 2026, we published in the *Federal Register* ([91 FR 16212](#)) a notice of our intent to request that OMB approve this information collection. In that notice, we solicited comments for 60 days, ending on June 1, 2026. We also published the *Federal Register* notice on Regulations.gov (Docket No. [FWS-HQ-MB-2026-0827](#)). We received one comment in response to that notice:

Comment 1: Electronic comment received June 1, 2026, via Regulations.gov (FWS-HQ-MB-2026-0827-0003) from Victoria Lopez. The commenter requested the Service protect migratory birds.

Agency Response to Comment 1: The commenter did not address the information collection requirements; therefore, not response is required.

In addition to the *Federal Register* notice, we consulted with the nine (9) individuals identified below who familiar with this collection of information in order to validate our time burden estimate and asked for comments on the questions below. We received responses from one organization.

Organization

The Links at Erie Village
Steve Klem
City of Sioux Falls
Port of Seattle
Metropolitan Knoxville Airport Authority
USDA Wildlife Services – Louisiana

The Nature Conservancy – Independence Creek
Pennsylvania Fish and Boat Commission

Title

Superintendent
Individual
Animal Control Supervisor
Airport Wildlife Biologist
Director of Operations
State Director
Natural Resource Specialist
Manager
Director of Hatcheries

“Whether or not the collection of information is necessary, including whether or not the information will have practical utility; whether there are any questions they felt were unnecessary”

Comment 1: The commenter indicated that the information requested is necessary and has practical utility to ensure the permit program is working.

Agency Response/Action Taken: The Service appreciates the commenter’s feedback.

“The accuracy of our estimate of the burden for this collection of information”

Comment 1: The commenter indicated that given the amount of data requested in the

application, it takes approximately 2-3 business days to complete. The commenter expressed confusion regarding the separation of the application and the depredation annual report.

Agency Response/Action Taken: The Service will consider the information provided by the commenter during the next revision of this information collection.

“Ways to enhance the quality, utility, and clarity of the information to be collected”

Comments: The commenter noted that the website is difficult to navigate when searching for certain forms.

Agency Response/Action Taken: The Service appreciates the commenter's feedback and would encourage the commenter to provide specific suggestions for improving the website to which they refer.

And

“Ways to minimize the burden of the collection of information on respondents”

Comments: The commenter expressed support for automating application and annual reporting requirements, indicating that it would streamline the process and make it easier to submit annual reports with multiple pages.

Agency Response/Action Taken: The Service is currently working to digitize and automate all annual report forms relating to migratory bird permits, including Form 3-2436.

9. Explain any decision to provide any payment or gift to respondents, other than remuneration of contractors or grantees.

We do not provide payments or gifts to respondents.

10. Describe any assurance of confidentiality provided to respondents and the basis for the assurance in statute, regulation, or agency policy.

We do not provide any assurance of confidentiality. Information is collected and protected in accordance with the Privacy Act (5 U.S.C. § 552a) and the Freedom of Information Act (5 U.S.C. 552). We will maintain the information in a secure System of Records (Permits System—Interior, FWS-21, September 4, 2003, [68 FR 52610](#); and modifications published June 4, 2008, [73 FR 31877](#), March 16, 2023, [88 FR 16277](#); and January 12, 2024, [89 FR 2230](#)). The information is not publicly available and we only share the information with agencies having a legal interest.

11. Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private. This justification should include the reasons why the agency considers the questions necessary, the specific uses to be made of the information, the explanation to be given to persons from whom the information is requested, and any steps to be taken to obtain their consent.

We do not ask questions of a sensitive nature.

12. Provide estimates of the hour burden of the collection of information. The statement

should:

- * Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. Unless directed to do so, agencies should not conduct special surveys to obtain information on which to base hour burden estimates. Consultation with a sample (fewer than 10) of potential respondents is desirable. If the hour burden on respondents is expected to vary widely because of differences in activity, size, or complexity, show the range of estimated hour burden, and explain the reasons for the variance. Generally, estimates should not include burden hours for customary and usual business practices.
- * If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens.
- * Provide estimates of annualized cost to respondents for the hour burdens for collections of information, identifying and using appropriate wage rate categories. The cost of contracting out or paying outside parties for information collection activities should not be included here.

We estimate that we will receive **30,334 responses** totaling **10,887 annual burden hours**. We estimate the annual dollar value of the burden hours to be **\$623,227** (rounded). We used table 1 from the of Bureau of Labor Statistics (BLS) [News Release](#) USDL-26-0505, March 20, 2026, Employer Costs for Employee Compensation—December 2025, to calculate the total annual burden.

- Individuals – the hourly rate for all workers is \$48.78, including benefits.
- Private Sector – the hourly rate for all workers is \$46.15, including benefits.
- Government – the hourly rate for all workers is \$65.68, including benefits.

Respondent	Activity	Annual No. of Respondents	Number of Submissions Each	Total Annual Responses	Avg. Time per Response (hours)	Total Annual Burden Hours*	Hourly Labor Costs Incl. Benefits	Dollar Value of Annual Burden Hours

*Rounded to match ROCIS

13. Provide an estimate of the total annual non-hour cost burden to respondents or recordkeepers resulting from the collection of information. (Do not include the cost of any hour burden already reflected in item 12.)

- * The cost estimate should be split into two components: (a) a total capital and start-up cost component (annualized over its expected useful life) and (b) a total operation and maintenance and purchase of services component. The estimates should take into account costs associated with generating, maintaining, and disclosing or providing the information (including filing fees paid for form processing). Include descriptions of methods used to estimate major cost factors including system and technology acquisition, expected useful life of capital equipment, the discount rate(s), and the time period over which costs will be incurred. Capital and start-up costs include, among other items, preparations for collecting information such as purchasing computers and software; monitoring, sampling, drilling and testing equipment; and record storage facilities.
- * If cost estimates are expected to vary widely, agencies should present ranges of cost burdens and explain the reasons for the variance. The cost of purchasing or contracting out information collection services should be a part of this cost burden estimate. In developing cost burden estimates, agencies may consult with a sample of respondents (fewer than 10), utilize the 60-day pre-OMB submission public comment process and use existing economic or regulatory impact analysis associated with the rulemaking containing the information collection, as appropriate.

- * Generally, estimates should not include purchases of equipment or services, or portions thereof, made: (1) prior to October 1, 1995, (2) to achieve regulatory compliance with requirements not associated with the information collection, (3) for reasons other than to provide information or keep records for the government, or (4) as part of customary and usual business or private practices.

We estimate that each participating State/Tribe will incur overhead costs (materials, printing, postage, etc.) associated with mailing surveys to conservation order participants of approximately \$2,000, or a total of \$78,000 in non-hour burden costs (39 responses x \$2,000). Conservation order participants manually report the data back to the States/Tribes who then report it electronically to the Service (as explained in question 3).

14. Provide estimates of annualized cost to the Federal government. Also, provide a description of the method used to estimate cost, which should include quantification of hours, operational expenses (such as equipment, overhead, printing, and support staff), and any other expense that would not have been incurred without this collection of information.

The estimated annual cost to the Federal Government for reviewing and processing reports associated with this collection of information is **\$32,511** (rounded) (\$32,211 (rounded) in salaries, plus \$300 for mailing).

We used Office of Personnel Management Salary Table [2026-DCB](#) to obtain the most up-to-date hourly rates for staff. We used BLS [News Release](#) USDL-26-0505, and multiplied the hourly wage by 1.62 to account for benefits.

Action	Position and Grade	Hourly Rate	Fully Burdened Hourly Rate (x 1.62)	Total Annual Hours	Annual Cost
Review and process annual and take reports	GS 12/5	\$ 55.62	\$ 90.10	55	\$ 4,955.50
Prepare spreadsheet, consolidate information, review harvest totals, and maintain necessary files on light geese.	GS 12/5	55.62	90.10	2.5	225.25
Nest and egg registration - administration	GS 12/5	55.62	90.10	150	13,515.00
Nest and egg registration - collect and assess data	GS 12/5	55.62	90.10	150	13,515.00
TOTAL:					\$ 32,210.75

15. Explain the reasons for any program changes or adjustments in hour or cost burden.

We are not reporting any program changes or adjustments with this renewal.

16. For collections of information whose results will be published, outline plans for tabulation and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection of information, completion of report, publication dates, and other actions.

We will not publish the results of this information collection.

17. If seeking approval to not display the expiration date for OMB approval of the information collection, explain the reasons that display would be inappropriate.

We will display the OMB control number and expiration date on appropriate materials.

18. Explain each exception to the topics of the certification statement identified in "Certification for Paperwork Reduction Act Submissions."

There are no exceptions to the certification statement.
