

Justification for Non-Substantive Change
DS-5501
OMB Control No. 1405-0153

OIRA approved a renewal of this information collection on April 15, 2026, with a new expiration date of April 30, 2029. In the ICR package (202603-1405-003) in ROCIS, the wrong version of the DS-5501 was inadvertently uploaded.

The new form that was supposed to be approved requested the respondent's passport information, changed the field for "gender" to "sex", and added a payment page to the application. The Supporting Statement-A uploaded to ROCIS contained the correct description of these changes in paragraph 15. The change to the form was also pursuant to a final rulemaking. Since the uploading of the wrong form was clearly an administrative error, the Department requests that the record reflect approval of the correct version of the DS-5501.

Attached is the correct version of the form.
