Generic Clearance for Contractor Safety
OMB Control Number 1910-5203

Justification for No Material/Nonsubstantive Change

BPA received a request from its Safety organization to make a minor change to the Contractor Energized Electrical Work Permit, which is part of PRA Package 1910-5203. The primary change was the removal of an assertion, “Do you agree the above described work can be done safely? (If no, return to requester)” which was followed by a set of Yes/No checkboxes. The Safety organization determined that the question was causing confusion amongst users and requested the removal.

Since the removal necessitated a full reconstruction of the form, BPA also made minor aesthetic changes such as ensuring the font size was 10 point throughout the form and removing the use of colored text. These changes are administrative in nature and do not affect the information collected, respondent burden, or the purpose of the collection.

BPA considers these changes non-substantive and requests OMB approval of the updated form under 1910-5203.
