

PHYSICAL, PROCEDURAL, AND ADMINISTRATIVE SAFEGUARDS:

1. Access to working spaces and patient medical record storage areas in VA health care facilities is restricted to authorized VA employees. Generally, filing areas are locked after normal duty hours. Health care facilities are protected from outside access by the Federal Protective Service and/or other security personnel. Access to patient medical records is restricted to VA employees who have a need for information in the performance of their official duties. Sensitive patient medical records, including employee patient medical records, records of public figures, or other sensitive patient medical records are generally stored in separate locked files or a similar electronically controlled access environment. Strict control measures are enforced to ensure that access to and disclosures from these patient medical records are limited.

2. Access to computer rooms within health care facilities is generally limited by appropriate locking devices and restricted to authorized VA employees and vendor personnel. Only authorized VA employees or vendor employees may access information in the system. Access to file information is controlled at two levels: the system recognizes authorized employees by a series of individually unique passwords/codes as a part of each data message, and the employees are limited to only that information in the file that is needed in the performance of their official duties. Information that is downloaded and maintained on personal computers must be afforded similar storage and access protections as the data that is maintained in the original files. Access by remote data users such as Veteran Outreach Centers, Veteran Service Officers with power of attorney to assist with claim processing, VARO staff for benefit determination and processing purposes, OIG staff conducting official audits or investigations, and other authorized individuals is controlled in the same manner.

3. Access to the VA National Data Centers is generally restricted to Center employees, custodial personnel, Federal Protective Service, and other security personnel. Access to computer rooms is restricted to authorized operational personnel through electronic locking devices. All other persons gaining access to computer rooms are escorted. Information stored in the computer may be accessed by authorized VA employees at remote locations including VA health care facilities, VA Central Office, VISNs, and OIG Central Office and field staff. Access is controlled by

individually unique passwords/codes that must be changed periodically by the employee.

4. Access to records maintained at the VA Boston Development Center, Chief Information Office Field Offices, and VISNs are restricted to VA employees who have a need for the information in the performance of their official duties. Access to information stored in electronic format is controlled by USAccess card or individually unique passwords/codes. Records are maintained in manned rooms during working hours. The facilities are protected from outside access during non-working hours by the Federal Protective Service or other security personnel.

5. Computer access authorizations, computer applications available and used, information access attempts, and frequency and time of use are recorded.

6. Access to Oracle Health Technology Centers is generally restricted to Oracle Health employees, contractors or associates with an Oracle Health issued ID badge and other security personnel cleared for access to the data center. Access to computer rooms housing Federal data, hence Federal enclave, is restricted to persons Federally cleared for Federal enclave access through electronic badge entry devices. All other persons, such as custodians, gaining access to Federal enclave are escorted.

7. VA Enterprise Cloud data storage conforms to security protocols as stipulated in VA Directives 6500 and 6517. Access control standards are stipulated in specific agreements with Cloud vendors to restrict and monitor access.

Abstract: Public Law 94–502 established the Post-Vietnam Era Educational Assistance Program (VEAP). The VEAP program account is jointly funded by the eligible participant and the Department of Defense. The fund provides educational assistance payments to eligible participants who entered the service after December 31, 1976, and before July 1, 1985, and are pursuing training under chapter 32, title 38 U.S.C. The Application for Refund of Educational Contributions, VA Form 22–5281, is required to process a refund of contributions made by eligible participants who wish to disenroll from the program. If a participant stops enrollment from the program prior to discharge or release from active duty, such participant's contributions will be refunded on the date of the participant's discharge or release from active duty, or within 60 days of receipt of notice by the Secretary of the participants' discharge. If a participant stops enrollment from the program after discharge or release from active duty, the participant's contributions shall be refunded within 60 days of receipt of an application for a refund from the participant. In 2022, VA conducted a project which attempted to identify all Veterans with remaining chapter 32 contributions and provide them with the VA Form 22–5281 to receive a refund, as they're no longer eligible to use chapter 32 benefits. The burden for the current renewal has decreased because no similar large-scale effort to

contact Veterans was conducted during 2023, 2024, or 2025.

Affected Public: Individuals and households.

Estimated Annual Burden: 429 hours.

Estimated Average Burden per

Respondent: 10 minutes.

Frequency of Response: Once.
