estimated burden varies depending on the relevance of questions to an individual's personal history.

This information collection is currently approved by OMB, and OPM is seeking renewal without substantive change. OPM received approval in February of 2024 for non-substantive revisions to this collection which was previously approved in November of 2023. Pursuant to the Economic Growth, Regulatory Relief, and Consumer Protection Act (Pub. L. 115–174), security freezes do not restrict access to credit reports for employment, tenant, or background screening purposes; therefore, individuals are no longer required to lift a credit freeze during a background investigation and the instructions within the form were updated accordingly. Additionally, de minimis changes were made in May of 2025 to align with Executive Order 14168, *Defending Women From Gender Ideology Extremism and Restoring Biological Truth to the Federal Government,* January 20, 2025. These updates have already been incorporated into the eApp system.

A copy of the proposed information collection and the associated instructions are available at: *https://www.reginfo.gov/public/do/PRAMain.* Use the search function to enter either the title of the collection (*Questionnaire for National Security Positions*) or the OMB Control Number (3206–0005). OPM is not proposing any revisions to the form at this time. OPM recommends renewal of the form without any proposed changes due to the forthcoming plan to replace the SF 86 with the Personnel Vetting Questionnaire (87 FR 71700 and 88 FR 12703), which is currently approved and in development.

OPM invites comments on:

1. Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. The accuracy of the agency's estimate of the burden of the proposed collection of information;

3. Ways to enhance the quality, utility, and clarity of the information to be collected; and

4. Ways to minimize the burden of the collection of information on respondents, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.
