General Comment

Why are you ok with making the American government subservient to Israel's? Section 219 would require the defense secretary to appoint a Pentagon executive agent to oversee a United States-Israel Defense Technology Cooperation Initiative.

That official would coordinate bilateral defense research, development, testing, evaluation, industrial cooperation and supply chain collaboration between the two countries. It is a blatant violation of FARA and should be struck down.

Documented cases of Israel transferring U.S.-origin military technology to China and other countries date back decades and include high-profile controversies — notably alleged transfers connected to the canceled Lavi fighter program, sales of missile and electro-optics components, and post-2000 concerns over dual-use systems — prompting U.S. diplomatic protests, intelligence warnings, and criminal indictments in Israel.
