

If the Medication Reconciliation measure is removed from the ESRD QIP, the Medication Reconciliation section in EQRS would need to be removed. This section is found within the “Manage Clinical” section of the Patient Registry. To access it, users select “Patients”, then “Manage Clinical”.

EQRS | Patient Registry | CMS Support (Patient Registry) | Change organization

Overview | Dashboard | Facilities | Patients | Reports

## Manage Patient Clinical Values

Patient Search

Find Facility by facility ID, facility name, facility DBA, facility CCN, facility NPI, phone number, fax number \*

Collection Type \*  
Hemodialysis

Clinical Month \*  
July 2026 (Open)

Last Name Group

Patient Clinical Status

Search Patients

Select Patient

- Search Patients
- Admit a Patient
- Current Patient Roster
- Manage Clinical**
- Clinical Depression
- SSA Terminations
- Action List

The Medication Reconciliation section is found below the Ultrafiltration section and collects the following MedRec information:

### Medication Reconciliation

Was medication reconciliation performed in this clinical month? \*

Medication Reconciliation Clinician Type \*

Medication Reconciliation Clinician Name \*

Month: MM | Day: DD | Year: YYYY
