Abstract: The Commission uses the information collected under the requirements of FERC-511 to implement the statutory provisions of Sections 8 of the Federal Power Act (FPA) and 18 CFR Part 9 and 18 CFR 131.20 of the Commission's regulations. The application must show that the transfer is in the public interest and provide the qualifications of the transferee to hold such license and to operate the property under the license. The application for approval of transfer of license must conform to the requirements in 18 CFR Section 131.20, which must include the following: application statement by all parties; verification statement; proof of citizenship; evidence of compliance by the transferor with all applicable state laws or how the transferee proposes to comply; and qualifications of the transferee to hold the license and operate the project. Approval of the license transfer is also contingent upon the transfer of title to the properties under the license, transfer of all project files including all dam safety related documents, and delivery of all license instruments.
