TOTAL CAPITAL AND O&M COSTS (rounded)^e	
GRAND TOTAL (rounded)^e	

Assumptions

^a We have assumed there are approximately 56 existing sources and no new sources per year.

^b Assumes one-time burden of 30 hours for new sources to read and understand rule requirements.

^c This ICR uses the following labor rates: Managerial \$172.41 (\$82.10+ 110%); Technicians \$82.10. These rates are based on the Bureau of Labor Statistics, December 2023, "Table 2. Civilian workers by occupation and industry, 2023." The rates are rounded to the nearest dollar. The rates are used to account for varying industry wage rates and the additional overhead business costs for training, and equipping their employees. This ICR assumes that Managerial hours are 5 percent of total hours and Technician hours are 95 percent of total hours.

^d All recordkeeping burden is accounted for in the listed reporting activities.

^e Totals have been rounded to 3 significant figures. Figures may not add exactly due to rounding.

GRAND TOTAL (rounded) ^c

Assumptions

^a We have assumed there are approximately 56 existing sources and no new sources per year a

^b This cost is based on the average hourly labor rate as follows: Managerial \$76.91 (GS-13, St 60%). This ICR assumes that Managerial hours are 5 percent of Technical hours, and Clerical General Schedule, which excludes locality, rates of pay. The rates have been increased by 60 percent of Technical hours, and Clerical hours are 10 percent of Technical hours.

^c Totals have been rounded to 3 significant figures. Figures may not add exactly due to roundi
