respondents increased to 290,000 resulting in an increased annual burden of 9,666 hours.

1.

Explain the circumstances that make the collection of information necessary. Identify any legal or administrative requirements that necessitate the collection.

The collection involves information required for registration of an Airman Knowledge Test in the ATLAS Aviation test delivery system as part of the FAA Airman Certification Process.

The information collected is necessary to know who is taking a FAA knowledge test and to ensure compliance and proper registration of an individual for the necessary knowledge test for the certification or rating pursued by the individual. U.S. Code \$ 44703. Airman certificates states the Administrator of the Federal Aviation Administration shall issue an <https://www.law.cornell.edu/uscode/text/49/44703> airman certificate to an individual when the Administrator finds, after investigation, that the individual is qualified for, and physically able to perform the duties related to, the position to be authorized by the certificate.

FAA regulations in part 61, 65, and 107 require an individual to pass an Airman Knowledge Test as part of the individual's certification requirements. Individuals must be properly identified prior to taking an Airman Knowledge Test at an approved FAA Knowledge Testing Center.

2.

Indicate how, by whom, and for what purpose the information is to be used. Except for a new collection, indicate the actual use the agency has made of the information received from the current collection.

Individuals pursuing an FAA certificate or rating to operate in the National Airspace System (NAS) must meet the standards established in the FAA regulations specific to the certificate sought by the individual. FAA certification requires that an individual must successfully pass an Airman Knowledge Test as part of the requirements to obtain an FAA certificate or rating. The FAA develops and administers 90 different knowledge tests in many different areas that are required as part of the overall airman certification process.
</p>
<p style="line-height: 100%; margin-bottom: 0in">

Airman Knowledge Tests are administered at approved Knowledge Testing Centers by an approved test proctor who is required to administer the appropriate Airman Knowledge Test to the individual pursuing FAA certification through the ATLAS test delivery software. It is voluntary for individuals taking an FAA Airman Knowledge Test to report the following information on occasion in order to complete the registration process before the administration of the Airman Knowledge Test: Name, username, password, FAA Tracking Number (FTN), physical address, Date of Birth, email address, phone number, country, citizenship, branch of service, previous number of test attempts, flight school or field experience, graduation date, authorization category, accommodation selections, scheduled exam date, photo identification, and test authorization (credentials of the individual such as an instructor endorsement).
</p>
<p style="line-height: 100%; margin-bottom: 0in">

The information below is collected by the approved knowledge test delivery vendor in electronic format for the purposes stated below:

<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">

It
is anticipated that the information collected will not be disseminated to the public or used to support publicly disseminated information. The FAA will retain control over the information and safeguard it from improper access, modification, and destruction, consistent with FAA standards for confidentiality, privacy, and electronic information. The information collection is designed to yield data that meet all applicable information quality guidelines.
></p>
<p style="line-height: 100%; margin-bottom: 0in">

</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">
The
information is used by the FAA as part of the overall airman certification process for issuing certificates in accordance with FAA regulations and auditing that process for compliance.</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">

</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">
3.
Describe whether, and to what extent, the collection of information involves the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">

The
information is collected electronically through a system called Assessment Technology and License Administration System (ATLAS Aviation). ATLAS Aviation is the system used for test registration and delivery for all Airman Knowledge Tests. This collection is available to be submitted 100% electronically. There is no form involved and the results of this collection will not be made available to the public, as this information is not for public use. The link to ATLAS is here. <u>https://faa.psiexams.com/FAA/login</u></p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">

</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">
4.

Describe efforts to identify duplication. Show specifically why any similar information already available cannot be used or modified for use for the purposes described in Item 2 above.

The specific information collected is not already available after evaluating the current similar collections used by the FAA IACRA system which are certification specific and do not cover the information required for knowledge test registration.

5.

If the collection of information involves small businesses or other small entities, describe the methods used to minimize burden.

This collection will not involve small business or small entities.

6.

Describe the consequence to Federal program or policy activities if the collection is not conducted or is conducted less frequently, as well as any technical or legal obstacles to reducing burden.

The FAA will be unable to certificate any airman to operate in the National Airspace System (NAS) if collection is not conducted. Airman must be identified, vetted, and investigated in order to operate in the NAS for each type of certificate pursued by the airman which all starts with registering and taking a FAA Airman Knowledge Test. There are no obstacles if collection is conducted less frequently.

7.

Explain any special circumstances that would cause an information collection to be conducted in a manner:

- requiring respondents to report information to the agency more often than quarterly;
 - requiring respondents to prepare a written response to a collection of information in fewer than 30 days after receipt of it;
 - requiring respondents to submit more than an original and two copies of any document; requiring respondents to retain records, other than health, medical, government contract, grant-in-aid, or tax records, for more than three years;
 - in connection with a statistical survey, that is not designed to produce valid and reliable results that can be generalized to the universe of study;
 - requiring the use of a statistical data classification that has not been reviewed and approved by OMB;
 - that includes a pledge of confidentiality that is not supported by authority established in statute or regulation, that is not supported by disclosure and data security policies that are consistent with the pledge, or which unnecessarily impedes sharing of data with other agencies for compatible confidential use; or
 - requiring respondents to submit proprietary trade secrets, or other confidential information unless the agency can demonstrate that it has instituted procedures to protect the information's confidentiality to the extent permitted by law.
-

: #ffffff">
There
are no special circumstances.</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">

</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">
8.
Provide information on the PRA Federal Register Notice that solicited
public comments on the information collection prior to this
submission. Summarize the public comments received in response to
that notice and describe the actions taken by the agency in response
to those comments. Describe the efforts to consult with persons
outside the agency to obtain their views on the availability of data,
frequency of collection, the clarity of instructions and
recordkeeping, disclosure, or reporting format (if any), and on the
data elements to be recorded, disclosed, or reported.</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">

</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">
A
Federal Register Notice published on April 10, 2026 (88 FR 2752)
solicited public comment for 60 days. No comments were received.</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">

</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">
Analysis
of the burden, frequency of collection, disclosure, format, data
elements, clarity of instructions, and recording keeping was
conducted in collaboration with the FAA's testing vendor who owns
and operates the testing application. The historical data publicly
available provided the annual frequency of the burden to the public.
</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">

</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">

</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">

9.
Explain any decisions to provide payments or gifts to respondents, other than remuneration of contractors or grantees.

There are no payments or gifts provided to respondents.

10.
Describe any assurance of confidentiality provided to respondents and the basis for assurance in statute, regulation, or agency policy.

Airman providing information for this collection are protected under the Privacy Act. A privacy act statement is provided to the airman prior to submission of information. No additional assurances of confidentiality are provided.

11.
Provide additional justification for any questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

There are no questions of a sensitive nature.

12.
Provide estimates of the hour burden of the collection of information. The statement should:

9,666

hours annually

290,000 respondents x 2 minutes each = 580,000 minutes

580,000 minutes / 60 minutes in an hour = 9,666 hours annually

Estimated exam volume is based on 2025 airman knowledge test statistics. https://www.faa.gov/data_research/aviation_data_statistics/test_statistics/CY2025_AKT_Volume_Report.pdf 2025 Airman Knowledge Test Statistics.

The average burden time is 2 minutes per response based on observing time responses during development of the application.

Indicate the number of respondents, frequency of response, annual hour burden, and an explanation of how the burden was estimated. Unless directed to do so, agencies should not conduct special surveys to obtain information on which to base hour burden estimates. Consultation with a sample (fewer than 10) of potential respondents is desirable. If the hour burden on respondents is expected to vary widely because of differences in activity, size, or complexity, show the range of estimated hour burden, and explain the reasons for the variance. Generally, estimates should not include burden hours for customary and usual business practices. * If this request for approval covers more than one form, provide separate hour burden estimates for each form and aggregate the hour burdens.

Provide estimates of annualized cost to respondents for the hour burdens for collections of information, identifying and using appropriate wage rate categories. The cost of contracting out or paying outside parties for information collection activities should not be included here. Instead, this cost should be included under item 13.

</p>

Although
this submission may be a revision to an approved collection, and thus
describes only the new or changed requirements in Question 2, this
answer should state the total new burden hours and how much this
figure is increased/decreased from the previous burden (if any) for
the requirement. <font face="Ari
al, serif">NOTE:
You are NOT required to stick to the estimated numbers in the Federal
Register Notice for this collection.</p>

	Total burden (hours)
	9,666

The total annual cost burden to respondents is estimated to be \$525,889. See table below.

Respondents were categorized into certification categories that more accurately capture the appropriate wage rate based on U.S. Bureau of Labor Statistics. Wage rate per hour was calculated into per minute based on 2 minute average response time.

12pt">Annual
burden was calculated as (average response time x wage per minute x
number of responses) = Burden per minute.</p>

Provide estimates of annualized costs to the Federal government.
Also, provide a description of the method used to estimate cost,
which should include quantification of hours, operational expenses
(such as equipment, overhead, printing, and support staff), and any
other expense that would not have been incurred without this
collection of information.</p>
<p style="line-height: 100%; margin-bottom: 0in; background: #ffffff">

</p>

No
annualized costs to the Federal Government except for the annual security assessment cost which is \$35,000 to assess the system. FAA certificates are issued by the FAA's Airman Certification Branch (AFB-720) utilizing other processes and information collections. The OMB Control Numbers associated with those collections are 2120-0007, 2120-0021, 2120-0022, 2120-0690, and 2120-0724.

15.
Explain the reasons for any program changes or adjustments.

Adjustment
to the number of respondents annually based on increased test volume of airman taking FAA Airman Knowledge Tests. This increased the overall burden to 9,666 hours annually.

16.
For collections of information whose results will be published, outline plans for tabulation and publication. Address any complex analytical techniques that will be used. Provide the time schedule for the entire project, including beginning and ending dates of the collection of information, completion of report, publication dates, and other actions.
