Create New Bus Testing Form – Introduction with PRA Statement

[Intro](#)[Contact Info](#)[Regulatory Compliance](#)[Vehicle Info](#)[Required Testing](#)[Submit](#)[Back to Dashboard](#)

Introduction

This collection of information is required to obtain federal funds for new transit bus models or existing bus models that have been previously tested, but have undergone significant/major changes to their design. The information collected will be used for entry into FTA's Bus Testing Program. Title 49 U.S.C. Section 5318(e) provides that federal funds appropriated or otherwise made available under 49 U.S.C. Chapter 53 may not be obligated or expended for the acquisition of a new bus model unless a bus of that model has been tested for maintainability, reliability, safety, performance (including braking performance), structural integrity, fuel economy, emissions, and noise at a bus testing facility. Public reporting burden is estimated to average 2131 hours, including the time for reviewing instructions searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. 49 CFR Part 665.13(b) states that upon completion of testing of a new bus model at the Bus Testing Center, the scored test results and resulting test report will be provided to the bus manufacturer or entity that entered into a contract with the Center. The test report will be available to recipients only after both the bus manufacturer and FTA have approved it for release. If the bus manufacturer declines to release the report, or if the bus did not achieve a passing test score, the vehicle will be ineligible for FTA financial assistance. Please note that an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this collection is 2132-0550. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, Federal Transit Administration, 1200 New Jersey Avenue, SE, Washington, DC 20590.

The Bus Testing Form allows users to fill information in the below sections and submit the form to FTA for review

- Contact Information
- TVM Regulatory Compliance
- Vehicle Details
- Determination of Required Testing

Please enter the Bus Testing Form Name and click on Getting started to fill in the details.

TVM Regulatory Compliance

(required if seeking testing authorization)

Provide evidence of manufacturer/ vehicle compliance with all applicable Federal Motor Vehicle Safety Standards (FMVSS), and NHTSA requirements at 49 CFR Part:

565 - Vehicle Identification Number

566 - Manufacturer Identification

567 - Certification

568 - Vehicle Manufactured in Two or More Stages (if applicable)

Curb Weight

Front axle weight rating (GAWR)

Middle axle weight rating (GAWR) ('n/a' if not applicable)

Rear axle weight rating (GAWR)

Gross vehicle weight rating (GAWR)

Articulated bus?

☐ Yes ☐ No

Is this bus built on a chassis produced by another company?

☐ Yes ☐ No

Make/Model of chassis (required if chassis is produced by another company)

Describe any significant chassis modifications, or state 'unmodified'

Vehicle Details (Contd..)

Fuel Type/Power Source
 -- Select --

Other Fuel Type/Power Source

Hybrid powertrain?
☐ Yes ☐ No

Additional Information

Number of passenger seats (not including driver seat)

Number of wheelchair positions

Reduction in number of passenger seats when all wheelchair positions are in use (enter '0' if no reduction)

Manufacturer-designated standing passenger capacity: (Must match placard installed in bus)

Describe any significant differences between the design, components, techniques, tooling, and materials used in the test bus, and those that will be used in production of subsequent buses of this model (or state 'None')

Identify the country where these major components of the test unit were manufactured: (For each component listed below enter "USA", other country name, or "n/a" if not installed on the bus. Components that are included in a chassis built by another company may be indicated by entering "c")

Chassis	Body Shell	Front Axle	Middle Axle
Rear Axle	Engine	Fuel Injectors and Manifolds	Fuel Injection ECU
Transmission	Traction Battery Cells	Traction Batter Pack(s)	Electric Propulsion Motor(s)
Inverter(s)	Fuel Cell(s)	Fuel Tank(s)	

You may list other major bus components and their countries of origin here, if desired
