

Attachment 3b

Evaluating the Impact of Training and Technical Assistance (TTA) Programs on NCCCP Efforts – Evaluation Matrix for DP23-0017

Attachment 3b. Evaluation Matrix for DP23-0017

EQ 1: To what extent have the funded DP23-0017 recipients (TTA providers) increased networking, partnerships, and coordination with one another and other TTA providers?			
Evaluation Subquestions	Potential Indicators	Potential Data Sources	Analytic Approach
Process Questions			
1a. How did DP23-0017 TTA providers engage and network with one another, NCCCP program consultants, and members of the public health community to plan and implement their TTA plans?	Number, type, and topic of meetings or interactions between DP23-0017 TTA providers, NCCCP program consultants, and public health community members	- APRs - Bimonthly reports	Descriptive analysis
	Number and types of partnerships formed (as measured by number of memoranda of understanding [MOAs])	- APRs - Bimonthly reports	Descriptive analysis
	Number and type of other TTA providers, NCCCP program consultants, and public health community members engaged in DP23-0017 TTA activities	- APRs - Bimonthly reports	Descriptive analysis
	Areas of expertise among other TTA providers, NCCCP program consultants, and public health community members engaged in TTA activities	- APRs - Bimonthly reports	Descriptive analysis
	Number and type of collaborative TTA activities with partners other than funded program recipients	- APRs - Bimonthly reports	Descriptive analysis
	Successes and lessons learned, facilitators and challenges networking with others TTA providers	- APRs - Bimonthly reports - TTA plans - Interviews	Thematic analysis
1b. How did DP23-0017 TTA providers partner with SMEs across the country, including CDC SMEs, to deliver meaningful TTA?	Number of SMEs engaged in TTA delivery with DP23-0017 TTA providers	- APRs - Bimonthly reports	Descriptive analysis
	Areas of expertise, sector, and location of SMEs engaged in TTA delivery with DP23-0017 TTA providers	- APRs - Bimonthly reports - Evaluation reports - Interviews	Descriptive analysis
	Number, mode, type, and delivery method of TTA provided by SMEs (on behalf of DP23-0017 TTA providers)	- PM 1 - Evaluation reports	Descriptive analysis
	Successes and lessons learned, facilitators and challenges partnering with SMEs to provide TTA	- APRs - Bimonthly reports - TTA plans	Thematic analysis

EQ 1: To what extent have the funded DP23-0017 recipients (TTA providers) increased networking, partnerships, and coordination with one another and other TTA providers?			
Evaluation Subquestions	Potential Indicators	Potential Data Sources	Analytic Approach
		- Interviews - Evaluation reports	
1c. How did DP23-0017 TTA providers work collaboratively to coordinate an advisory group?	Composition and diversity of the advisory group, including areas of expertise	- APRs - Bimonthly reports - Evaluation reports	Descriptive analysis
	Role of DP23-0017 TTA providers in convening and facilitating advisory groups	Interviews Evaluation reports APRs TTA plans	Thematic analysis
	Participation rates in advisory group meetings by different members: - number of attendees per advisory group meeting - number of advisory groups meetings	- APRs - Bimonthly reports	Descriptive analysis
	Successes and lessons learned, facilitators and challenges collaborating on coordination of an advisory group	- APRs - Bimonthly reports - TTA plans - Interviews	Thematic analysis
Outcome Question			
1d. To what extent have DP23-0017 TTA providers increased networking, partnerships, and coordination with one another and other TTA providers?	Year-over-year change in number, type, and topic of meetings or interactions between DP23-0017 TTA providers, NCCCCP program consultants, and public health community members	- APRs - Bimonthly reports	Descriptive analysis
	Year-over-year change in number and types of partnerships (as measured by number of memoranda of understanding [MOAs])	- APRs - Bimonthly reports - Evaluation plans	Descriptive analysis
	Year-over-year change in number and type of other TTA providers, NCCCCP program consultants, and public health community members engaged in DP23-0017 TTA activities	- APRs - Bimonthly reports - Evaluation reports	Descriptive analysis
	Year-over-year change in number of SMEs engaged in TTA delivery with DP23-0017 TTA providers	- APRs - Bimonthly reports - Evaluation reports	Descriptive analysis
	Year-over-year change in participation rates among advisory group members	- APRs - Bimonthly reports - Evaluation reports	Descriptive analysis

EQ 2: To what extent did the TTA activities implemented by the DP23-0017 TTA providers reach DP22-2202 recipients and cancer coalitions?			
Evaluation Subquestions	Potential Indicators	Potential Data Sources	Analytic Approach
Process Questions			
2a. How are DP23-0017 TTA providers implementing TTA activities, including peer learning and communities of practice, to reach DP22-2202 recipients and cancer coalitions?	Number, content, and mode of TTA activities provided by DP23-0017 TTA providers, by type: - peer learning activities - communities of practice - other TTA activity types	• PM 1 • APRs • Bimonthly reports	• Descriptive analysis
	Characteristics of participants by: - peer learning activities - communities of practice - other TTA activity types	• APRs • Bimonthly reports • Evaluation reports • Survey	• Descriptive analysis
	Strategies implemented by DP23-0017 TTA providers to reach DP22-2202 recipients and coalitions through: - peer learning activities - communities of practice - other TTA activity types	• APRs • Bimonthly reports • Evaluation reports • Interviews	• Descriptive analysis
	Successes and lessons learned, facilitator, and challenges implementing TTA activities to reach DP22-2202 recipients and cancer coalitions	• APRs • Bimonthly reports • TTA plans • Interviews • Focus groups	• Thematic analysis
2b. How are DP23-0017 TTA providers communicating with DP22-2202 recipients, cancer coalitions, and the broader cancer prevention and control community to increase awareness of TTA resources?	Number, types, and timing of communication strategies used to disseminate TTA resources	• APRs • Bimonthly reports	• Descriptive analysis
	Awareness levels about TTA resources available among DP22-2202 recipients, cancer coalitions, and the broader cancer prevention and control community	• Survey	• Descriptive analysis
	Successes and lessons learned, facilitators and challenges communicating with DP22-2202 recipients, cancer coalitions, and others about TTA resources.	• APRs • Bimonthly reports • TTA plans • Interviews • Focus groups	• Thematic analysis

EQ 2: To what extent did the TTA activities implemented by the DP23-0017 TTA providers reach DP22-2202 recipients and cancer coalitions?			
Evaluation Subquestions	Potential Indicators	Potential Data Sources	Analytic Approach
Outcome Question			
2c. To what extent did the TTA activities implemented by the DP23-0017 TA providers reach DP22-2202 recipients and cancer coalitions?	Participation rates in TTA activities by DP22-2202 recipients and cancer coalitions, by TTA type, mode, delivery method, and content	PM 2	Descriptive analysis
	Characteristics of DP22-2202 participants in TTA activities by - type of recipient and/or cancer coalition - participant role type (e.g., program director, program manager, project coordinator, evaluator), if available - geographic location of recipient and/or cancer coalition	- Evaluation reports - DP22-2202 survey	Descriptive analysis
	Differences in participation by: - TTA type - TTA mode - TTA delivery method - TTA content - type of DP22-2202 recipient and/or cancer coalition - participant role type - geographic location of DP22-2202 recipient and/or cancer coalition	- PM 2 - Survey - DP22-2202 survey	Descriptive analysis

EQ 3: What is the impact of TTA provided by the funded DP23-0017 recipients on state, tribal, territorial, community, and local jurisdictions?			
Evaluation Subquestions	Potential Indicators	Potential Data Sources	Analytic Approach
Outcome Questions			
3a. To what extent did the TTA activities increase the knowledge and skills of the DP22-2202 recipients and coalitions?	DP22-2202 recipients' and cancer coalitions' perceptions about the type and content of TTA that contributed to improvements in their knowledge and skills to implement the strategies and activities of the NOFO, by approach	- Evaluation reports - Survey	Descriptive analysis
	DP22-2202 recipients' and cancer coalitions' perceptions about the specific areas of knowledge and skills that showed the most improvement as a result of the TTA	- Survey - Focus groups	- Descriptive analysis - Thematic analysis
3b. How did the TTA provided impact the formation and strengthening of partnerships among the DP22-2202 recipients and coalitions?	DP22-2202 recipients' and cancer coalitions' perceptions of their ability to form and strengthen partnerships as a result of TTA activities	- Survey - Focus groups	Descriptive and Thematic analysis
3c. How did the TTA provided affect DP22-2202 recipients' ability to effectively implement NCCCP strategies and activities?	Number and type of strategies and evidence-based interventions adopted by DP22-2202 recipients and cancer coalitions as a result of TTA efforts	PM 3	Descriptive analysis
	DP22-2202 recipients' and cancer coalitions' perceptions about the influence of TTA activities on: - their adoption of EBIs - their capacity to implement NCCCP programs and activities	- Survey - Focus groups	Descriptive analysis
	DP22-2202 recipients' and cancer coalitions' perceptions about extent to which their strategies and approaches were initiated or enhanced as a result of the TTA provided - evidence-based and promising practices - PSE change approaches - innovative interventions - health for all approaches - change approaches for upstream non-medical factors that influence health	- Survey - Focus groups	Descriptive and Thematic analysis

EQ 3: What is the impact of TTA provided by the funded DP23-0017 recipients on state, tribal, territorial, community, and local jurisdictions?			
Evaluation Subquestions	Potential Indicators	Potential Data Sources	Analytic Approach
	DP22-2202 recipients' and cancer coalitions' perceptions about the extent to which TTA activities and topics are useful and relevant	- Survey - Focus groups	Descriptive and Thematic analysis
	DP22-2202 recipients' satisfaction with the quality of TTA received	- Evaluation reports - Focus groups - Survey	Thematic and Descriptive analysis
	Topic areas in which DP22-2202 recipients and cancer coalitions report needing more training or support	- TTA plans - Evaluation reports - Focus groups - Survey	Thematic and Descriptive analysis
3d. To what extent, and how, did the TTA provided enhance DP22-2202 recipients' ability to reach populations of focus?	DP22-2202 funded programs' reach, by population of focus and approach: - evidence-based and promising practices - PSE change approaches - innovative interventions - health for all approaches - change approaches for upstream non-medical factors that influence health	DP22-2202 recipients' evaluation reports or surveys	Descriptive analysis
	Number, type, and content of TTA activities provided, by population of focus and approach	- APRs - Bimonthly reports - Evaluation reports	Descriptive analysis
	DP22-2202 recipients' perceptions about the extent to which TTA activities contribute to improvements in NCCCP recipients' and cancer coalitions' reach	Survey	Thematic and Descriptive analysis
3e. As a result of the TTA provided, what measures did DP22-2202 recipients and coalitions take to ensure the sustainability of their programs?	Processes implemented by DP22-2202 recipients and coalitions to ensure the sustainability of their programs, as a result of TTA received	- APRs - Bimonthly reports	Thematic analysis
	DP22-2202 recipients' and cancer coalitions' perceptions about the extent to which TTA activities contributed (are contributing) to the sustainability of their programs	- Survey - Focus Groups	Thematic and Descriptive analysis
