General Comment

Please put an end to hunting, fishing, and trapping. Please protect the animals. Animals deserve better than being stalked, harassed, tortured, and killed. People don't need to kill the animals to survive. People have a lot of food and clothing options today that they probably didn't have before. And people can enjoy the great outdoors in a lot of ways that will not harm and/or kill the animals. And Wildlife Refuges should be places of safety for animals from humans who want to kill them and bother them. Animals do suffer when they get killed, even fish. Check out the link below about fish. Please protect all the animals, because they are all precious and wonderful.
