Work Authorization Confirmed

Congratulations  Self Check confirmed that you are eligible to work in the United States. For more information on how we were able to confirm your work eligibility, read below.

Work Authorization Details

Self Check compared the information you provided to U.S. government records and can confirm that, based on the information you provided, you are eligible to work in the United States.

If you are hired today by an E-Verify participating employer and you use the same documents and information provided, you will likely be instantly work authorized when your employer checks your information using E-Verify.

In the event that you are not instantly work authorized, please work with your employer to ensure that your information was entered correctly and, if necessary, follow the step outlined by E-Verify to resolve any issues.

This doesn't mean that you are guaranteed to pass through E-Verify without issue. A number of things can happen between now and when a future employer checks your information using E-Verify that may cause you to get a mismatch. Those things include name changes, citizenship status changes, expiration of work authorization, or simple data entry error when your employer is entering your information into E-Verify. It is important that you keep your records up to date with the government to ensure an accurate employment verification process.

Self Lock allows you to lock your Social Security number (SSN) and protect it against unauthorized use in E-Verify or Self Check.

Your Self Lock remains active as long as your account remains valid and you have not unlocked your SSN. You can unlock your SSN anytime through your myE-Verify account.

Once you lock your SSN, no one can use your SSN in E-Verify or Self Check—including you.
