SUPPLEMENTARY INFORMATION:

Title: FERC-561, Interlocking Directorates

OMB Control No.: 1902-0099

Abstract: The FERC Form 561 responds to the Federal Power Act (FPA) requirements for annual reporting of similar types of positions which public utility officers and directors hold with financial institutions, insurance companies, utility equipment and fuel providers, and with any of an electric utility's 20 largest purchasers of electric energy (i.e., the 20 entities with high expenditures of electricity). The FPA specifically defines

most of the information elements in the Form 561 including the information that must be filed, the required filers, the directive to make the information available to the public, and the filing deadline.

The Commission uses the information required by 18 CFR 131.31 and collected by the Form 561 to implement the FPA requirement that those who are authorized to hold interlocked directorates annually disclose all the interlocked positions held within the prior year. The Form 561 data identifies persons holding interlocking positions between public utilities and other entities, allows the Commission to review these interlocking positions, and allows identification of possible conflicts of interest.

Type of Respondents: Each officer or director of a public utility also holding the position of officer, director, partner, appointee, or representative of any other entity listed in section 305(c)(2) of the FPA (including but not limited to organizations primarily engaged in the business of providing financial services or credit, insurance companies, security underwriters, electrical equipment suppliers, fuel provider, and any entity which is controlled by one or more of these entities).

Estimate of Annual Burden: The Commission estimates the total annual burden and cost¹ for this information collection as follows:

FERC Form 561, Annual Report of Interlocking Directorates
--

¹ Commission staff estimates that the industry's skill set and cost (for wages and benefits) for FERC-561 are approximately the same as the Commission's average cost. The FERC 2026 average salary plus benefits for one FERC full-time equivalent (FTE) is \$213,003/year (or \$102.00/hour).

Number of Respondents (1)	Annual Number of Responses per Respondent (2)	Total Number of Responses (1) *(2) = (3)	Average Burden & Cost Per Response (4)	Total Annual Burden Hours & Total Annual Cost (3) *(4) = (5)	Cost per Respondent (\$) (5) ÷ (1)
2,700	1	2,700	0.25 hrs.; \$25.50	675 hrs.; \$68.850	\$25.50

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.
