2. Use of the Information.

FAR 52.204-26, Covered Telecommunications Equipment or Services—Representation.

FAR 52.204-24, Representation Regarding Certain Telecommunications and Video Surveillance Services or Equipment.

Contracting officers use the information collected under these provisions to identify if an offeror provides or uses any covered telecommunications equipment or services as a part of its offered products or services to the Government in the performance of any contract, subcontract, or other contractual instrument. In the event that offerors are required to disclose further information, the contracting officer uses the collected information to ensure compliance with the FAR as implemented by statute.

FAR 52.204-25, Prohibition on Contracting for Certain Telecommunications and Video Surveillance Services or Equipment.

Contracting officers use the information collected under this clause to ensure compliance and consult with legal counsel and the program office on next steps regarding the prohibited equipment or services.

3. Use of Information Technology. Federal agencies use information technology to the maximum extent practicable. Where both the Government agency and contractors are capable of electronic interchange, the offerors and contractors may submit this information collection requirement electronically. The usage of information technology will be nearly 100 percent.

FAR 52.204-26 and 52.204-24. In order to reduce the information collection burden imposed on the public, offerors represent annually using SAM.

FAR 52.204-25. In the case of DoD, contractors shall report

using the website at <https://dibnet.dod.mil>.

4. Non-duplication. There is no duplication of information under this collection. These requirements are issued under the FAR, which has been developed to standardize Federal procurement practices and eliminate unnecessary duplication.

Consequences if collection is not conducted or conducted less frequently could include the compromise of Government information systems, release and compromise of Government data, and harm to national security.

FAR 52.204-26 and 52.204-24 are collected in SAM annually and cannot be any less frequent.

FAR 52.204-25 is collected at the contract level, collection of information on a basis other than contract-by-contract is not practical.

FAR 52.204-26, Covered Telecommunications Equipment or Services–Representation:

In order to maintain an active registration in SAM, all entities are required to complete the FAR 52.204-26 representation in SAM. Therefore, it is assumed that all offerors in SAM will fill out the representation to retain an active SAM registration.

According to data from SAM, as of April 2026, there were 562,884 unique vendors registered in SAM.

It is assumed that it will take 1 hour for reviewing instructions, searching existing data sources, and completing the representation.

The following burden estimates for FAR 52.204-24 and FAR 52.204-25 are based on an average of historical procurement data available in [SAM.gov](https://sam.gov). The data shows that 111,495 unique entities were awarded contracts for fiscal years 2023 through 2025.

FAR 52.204-24, Representation Regarding Certain Telecommunications and Video Surveillance Services or Equipment:

It is estimated that the number of entities required to represent will be 1 percent of the number of unique entities awarded contracts (1% of 111,495 or 1,115). It is estimated that up to 25 percent of these unique entities (25% of 1,115 or 279) will be responsible for submitting more detailed disclosures regarding the use of covered telecommunications equipment or services. In cases where additional detail is necessary, an average of 3 responses per entity it's estimated. The representation at FAR 52.204-24 is estimated to average 3 hours per response to review the prohibitions, research the source of the product or service, and complete the additional detailed disclosure, if applicable.
