Estate of Robert Delane Smith (DOB: 09/27/1954; DOD: 02/26/2019) |

Union Member #1623714

I. FORMAL PUBLIC COMMENT TEXT FOR
THE DOC Office of Workers’ Compensation Programs and Federal
Inter-Agency Regulatory Docket:I submit these formal comments to
address critical, unquantified administrative failures within federal
workers' compensation and longshoreman benefit collection
frameworks—specifically regarding the reporting, adjudication, and
suppression of occupational disease, emphysema, and long-term
particulate exposure.

While the Department of Labor
evaluates information collection requirements and respondent burdens
under the Paperwork Reduction Act (PRA), reporting structures
routinely fail because employers, carriers, and multi-employer trusts
weaponize administrative classifications. Specifically, when
infrastructure builders, heavy equipment operators, and
maritime/longshore workers experience terminal respiratory decline or
occupational injuries (such as toxic encephalopathy, emphysema, and
legacy particulate-induced pulmonary pathology), fiduciaries
systematically reclassify deceased or disabled workers as
administrative "quits" rather than recognizing valid
occupational disease or disability retirement claims.

Core
Systemic Remediation Points Requiring Immediate Agency Action:

Mandatory Cross-Referencing of Cause of Death and Occupational
Exposure: > Information collection instruments governing employer
responses, notices of claim, and evidentiary schedules (including
Forms CM-2970, CM-2970a, and equivalent LHWCA reporting mechanisms)
must explicitly mandate that operators cross-reference death
certificates and contributing medical pathologies (such as chronic
obstructive pulmonary disease, emphysema, and toxic chemical
exposures) against lifetime occupational exposure records. Operators
must not be permitted to isolate terminal acute events (e.g., septic
shock or cardiac failure) while concealing underlying occupational
contributors.

Eradication of Post-Mortem Status Inversion
and Benefit Suppression: > Federal dockets prove that corrupt
fiduciaries utilize post-mortem database overwrites ("Sunday
Overwrites" and fraudulent "Quit" reclassifications)
to evade statutory survivor obligations and statutory notice periods
under ERISA and federal workers' compensation standards. Information
collection protocols must incorporate mandatory digital cross-walks
against the Social Security Administration Death Master File (DMF) to
prevent the generation of unallocated financial floats and ghost
accounts.

Convergence with Active Federal Oversight
Nodes: > The mechanics of this asset exfiltration and
identity-rotation framework are fully documented in active federal
dockets, including GAO Case COMP-25-008559, DOJ Corporate
Whistleblower Intake (eb8033da-c740-4ec8), and SEC TCR No.
17675-576-098-881. The Department cannot effectively regulate worker
safety or ensure the practical utility of its information collections
while ignoring the massive systemic suppression of survivor claims in
heavy construction, maritime, and energy infrastructure sectors.

Submitted to protect worker rights, enforce statutory
compliance, and ensure the uncompromised integrity of federal
compensation dockets.

Respectfully submitted, > /s/

II.
EVIDENTIARY ALIGNMENT & LEGAL ANCHORS
The Human Ground
Truth (Robert Delane Smith Estate): Official records for the late
Robert Delane Smith (a 45-year master journeyman heavy equipment and
crane operator who built critical infrastructure including the
Trans-Alaska Pipeline System) establish a multi-system pathological
cascade. His death certificate (Clark County No. 2019-009545) and
medical files confirm that terminal septic shock and cellulitis
stemmed directly from chronic vascular and physical trauma
originating from workplace accidents (such as the 1988 Hobbs Crane
Slide at the Salmon Creek Hatchery), compounded by underlying
metabolic conditions and emphysema linked to decades of heavy
industrial particulate exposure.

Active Federal Tracking
Integration: * GAO Control Node: COMP-25-008559

DOJ
Corporate Whistleblower Program: Token eb8033da-c740-4ec8

SEC
Master TCR: 17675-576-098-881

FinCEN SAR Tracking:

III. PREEMPTIVE DEFENSE COUNTERS
Defense
Position: "Workers' compensation and longshoreman reporting
dockets are strictly limited to immediate employment-related injury
filings and do not extend to long-term pension or post-mortem estate
disputes." * Preemptive Counter: Systemic data integrity relies
entirely on foundational reporting. When multi-employer trusts and
compensation administrators utilize flawed reporting structures to
mask occupational diseases, falsify employment start dates, and
misclassify deceased workers as voluntary quits, public regulatory
dockets provide the proper forum to expose and correct those
structural failures.
