

1. Tracking number: mpx-lm41-0rew

Name: Jonathan Angel

Address: Dallas, TX

Email: jonathan_angel@alumni.baylor.edu

Response: Thank you for your comment on the proposed extension of the CNHGQ. We appreciate your positive feedback on the utility of the questionnaire as an important instrument for patient care.

2. Tracking No. msa-n7uu-9thc

Name: Mitchell Berger

Address: Rockville, MD, 20857

Email: mazruia@hotmail.com

Response: Thank you for your comments on the proposed extension of the CNHGQ. The CDC *Cyclospora* program is considering these comments and plans to assess whether the instrument should be updated to reflect experience and lessons learned since the previous renewal. As part of this assessment, the program will seek input from end users and subject matter experts to determine whether modifications are warranted. If changes are recommended, the program will revise the instrument as appropriate. Because this review process will take time, no changes are reflected in the instrument at this time.

3. Tracking No. msd-13az-9s47

Email: MTeplitski@freshproduce.com

Organization: International Fresh Produce Association

Response: Thank you for your comments on the proposed extension of the CNHGQ. The CDC *Cyclospora* program is considering these comments and plans to assess whether the instrument should be updated to reflect experience and lessons learned since the previous renewal. As part of this assessment, the program will seek input from end users and subject matter experts to determine whether modifications are warranted. If changes are recommended, the program will revise the instrument as appropriate. Because this review process will take time, no changes are reflected in the instrument at this time.
