

Journalists (interview script)

Good morning/afternoon. My name is Ashley Sanders-Jackson. I am a social scientist working for the HHS Office of Climate Change and Health Equity. We are trying to understand what information would be most helpful for journalists that we could provide about climate, extreme weather and health equity. I'm going to ask you a series of questions to help us make the information we provide the most useful to you. Additionally, we'd like to know your preferred method for getting this information. This interview should take about 30 minutes [60 minutes if it is a group interview or focus group]. I am going to record the interview via Zoom and we can stop at any time. [I am recording this interview using my tape recorder, and we can stop at any time.] Do you have any questions?

What are the barriers you experience when creating news about climate, extreme weather and health equity?

What are the benefits of creating news about climate, extreme weather and health equity?

What information about climate and health equity would be most impactful from your perspective?

What is the best way to get information to you or other journalists?

In general, are you more interested in information products versus underlying data?

What is the level of geographic scale that is most useful to you?

Are you interested in getting case studies?

How would you use case studies?

What types of case studies would be most interesting?

What else do I need to know?

Journalists (alternate written form)

Good morning/afternoon. My name is Ashley Sanders-Jackson. I am a social scientist working for the HHS Office of Climate Change and Health Equity. We are trying to understand what information would be most helpful for journalists that we could provide about climate, extreme weather and health equity. Have attached a series of questions to help us make the information we provide the most useful to you. Additionally, we'd like to know your preferred method for getting this information. This questionnaire should take about 30 minutes.
