Human Trafficking Youth Prevention Education (HTYPE) Demonstration Grant Program Background

The HTYPE Demonstration Grant Program funds local educational agencies (LEAs) to develop and implement programs to prevent human trafficking victimization through the provision of skills-based human trafficking training and education for school staff and students as specified in Section 101(a)(2)(B) of the Frederick Douglass Trafficking Victims Prevention and Protection Reauthorization Act of 2018 (22 U.S.C. 7104(b)(2)).

Each training and education curriculum is to be tailored to the specific needs of its audience. The HTYPE Demonstration Grant Program will fund LEAs to establish a cohesive strategy, with the support of a partnered nonprofit or nongovernmental organization (NGO), to build the capacity to provide all aspects of human trafficking prevention education to students and school staff.

The HTYPE Demonstration Grant Program Performance Indicators information collection will provide data for the Office of Trafficking in Persons (OTIP) to assess the extent to which grantees meet required program activities to: 1) Provide human trafficking education that equips educators and other staff to identify and respond to signs that students are at high risk of or are currently experiencing human trafficking; 2) Deliver student human trafficking prevention education that is designed to build student resilience to labor trafficking and sex trafficking by strengthening student knowledge and skills; 3) Train qualified individuals to implement and replicate project activities throughout the school district or identified target area(s), and; 4) Establish and implement a Human Trafficking School Safety Protocol (HTSSP).

THE PAPERWORK REDUCTION ACT OF 1995 (Pub. L. 104-13) STATEMENT OF PUBLIC BURDEN: Through this information collection, ACF is gathering data on the grant program to assess program performance, inform evaluation, tailor technical assistance, report to stakeholders, and inform policy and program development. Please see each form/tab for the estimated public reporting burden for each collection of information per response, including the time for reviewing instructions, gathering and maintaining the data needed, and reviewing the collection of information. This collection of information is required to retain a benefit (22 U.S.C. 7104(b)(2))). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information subject to the requirements of the Paperwork Reduction Act of 1995, unless it displays a currently valid OMB control number.

How to Use This Workbook

Human Trafficking Youth Prevention Education (HTYPE) Demonstration Grant Program grant recipients are expected to conduct ongoing evaluations of their HTYPE curriculum by administering pre/post-implementation surveys to every student, educator, caregiver, and other staff member who participates in the training. All pre-implementation surveys for students, educators and other staff must be administered prior to, or within, one day of the start of training. All post-implementation surveys must be administered within one week after the completion of all training modules.

Over the course of the HTYPE Demonstration Grant Program, grant recipients will use the pre- and post-implementation surveys to collect data from participants in the curriculum. This data will then be aggregated and submitted to OTIP via this Excel-based data collection workbook and submitted via GrantSolutions.gov as a "grant note" to fulfill post-award performance reporting requirements.

HTYPE Demonstration Grant Program Implementation Surveys
- HTYPE for Educators (and Other Staff) Pre- and Post-Implementation Survey
- HTYPE for Middle+ Students Pre- and Post-Implementation Survey
- HTYPE for Elementary Students Pre- and Post-Implementation Survey
- HTYPE Training of Trainers (ToT) Post-Implementation Survey

Each tab in this workbook corresponds with a survey instrument and its corresponding HTYPE curriculum. All data will be reported as either a number or a percentage. Because the pre- and post-implementation surveys (and each question on those surveys) are optional for respondents, it is possible that not all HTYPE curriculum participants will provide repsonses to the surveys (or particular questions on the surveys). Grant recipients will be expected to provide the N-value (or number of survey respondents) represented for each percentage reported.

Example: A classroom of 35 middle school students participate in the HTYPE curriculum in the first quarter of the reporting period. Only 30 of those students choose to fill-out a pre-implementation survey. Only 10 percent of those 30 students (3 students) are able to identify a hotline they can contact if they think someone is being exploited for labor or sex on the pre-implementation survey. On the HTYPE for Students (Middle+) tab, HTYPE grant recipients would report '10%' in cell I17 (percentage) and '30' in cell I18 (N-value).

There are columns for each quarterly submission figure that specify the format of the data that should be reported in the table. Data on the Participation Summary tab will automatically update based on the information reported on all other tabs of this workbook. There are also helpful comments embedded throughout the workbook. Cells with comments have a small red triangle in the upper right corner of the cell. Select the cell or hover over the cell to view the comment. Comments can be toggled on and off by clicking on the 'Review' tab in the upper navigation bar and clicking 'Show All Comments' button.
