IECMHC Survey for OCC Administrators
Audience: Child Care Development Funds State Leads

For the purposes of the scan, Infant and Early Childhood Mental Health Consultation (IECMHC) is defined as a prevention-based service that pairs a mental health consultant with families and adults who work with infants and young children in the different settings where they learn and grow, such as child care, preschool, and their home. The aim of IECMHC is to build adults' capacity to strengthen and support the healthy social and emotional development of children – early and before intervention is needed. IECMHC improves children's lives by supporting their social, emotional and behavioral health and development. (Center of Excellence for IECMHC, SAMHSA). IECMHC programs can be funded in a variety of ways, including through state, federal or local governments, and private non-profits, or a combination of these sources. We are interested in how the child care system is supported by IECMHC funded through any of these sources.

The project team would love your feedback on this survey in order to obtain input about availability, awareness, and understanding of services, and to identify key points of contact in this area. The results and feedback from this survey will be analyzed and consolidated into a document meant to inform ACF activities, and may be incorporated into documents and presentations that are made public.

This survey is estimated to take 30 minutes or less to complete. Please remember that your participation is voluntary, and all information you provide will be kept private.
