Greetings PREIS Evaluators,

On behalf of FYSB, we are happy to share the PREIS Analysis Plan Template (attached).

Please use the template to draft your analysis plan. The template serves as a guideline for articulating the details of your analysis to successfully answer your evaluation's research questions. Completing the template will also help the LES team to determine areas where we can provide additional support. This document contains guidance and instructions for what you should include in the different sections of your plan and how to integrate the analysis plan into your evaluation plan so all the information guiding your evaluation is in one place. Throughout the template we also include tips and relevant expectations from the Standards for Rigor.

Evaluators, please work with your LES liaisons to develop your analysis plan and submit a complete analysis plan incorporated into your evaluation plan for formal review by May 16, 2025 to ensure timely approval. Your LES liaisons are available to work with you on thinking through your analysis plans, completing sections of the template, and reviewing sections as you draft them. Please plan to use your calls with your liaison to work on your analysis plans.

We are also sharing a recording, which walks through the analysis plan template. Your LES liaison is available for questions, and we will provide additional opportunities to discuss questions as a group. You can also email PREPLES@abtglobal.com if you have any questions in the meantime.

Thanks!

~PREP LES Team
