Subject:	[EXTERNAL] Public comment — OMB 1125-0001 — total annual burden arithmetic inconsistency
Date:	Monday, August 24, 2026 10:06:54 PM

Executive Office for Immigration Review,

I am submitting a focused comment on the August 20, 2026 60-day notice for OMB Control No. 1125-0001 (Forms EOIR-42A and EOIR-42B).

The notice states a combined total annual burden of 88,873 hours. However, the burden table lists 8,492 hours for EOIR-42A and 80,380 hours for EOIR-42B. Those two published subtotals sum to 88,872 hours, not 88,873.

Because this notice specifically asks for comment on the accuracy of the burden estimate and the validity of the methodology, I recommend reconciling the one-hour discrepancy before the package is submitted to OMB. If the intended total is 88,873, the underlying row-level value or rounding method should be corrected or explained; if the row values are correct as published, the combined total should read 88,872.

This is a narrow arithmetic/data-integrity comment; I am not taking a position on the substantive immigration policy reflected in the forms.

Thank you,

Seth Morrow
